King County + Western WA Clean Cities Present

Charged Up: Electric Vehicle Charging Expo

Participants:

BTCPower | Charge Northwest | DKS Associates
Electric Commute | Envision Solar | Envoy | EverCharge
Leviton Manufacturing | Northwest Partners LLC
Op Connect | Puget Sound Solar | Sema Connect
Participants:

**BTCPower** has a large array of Level 2 AC charging station products that range from home chargers, to workplace, multi-dwelling and commercial charging stations. BTCPower also has an extensive line of DC fast chargers. Contact info: Don Jarecki, 847-374-8840, djareckiebtpower.com

**Charge Northwest** has teamed with ChargePoint, Inc. and the ChargePoint™ Network to provide world class electric vehicle supply equipment and supporting services for the region. Contact info: Jim Blaisdell, 253-304-5625, blaze@chargenw.com

**DKS** is an employee-owned transportation planning and engineering firm supporting vehicle electrification by planning electric vehicle charging infrastructure for fleets, workplaces, residential developments and shared mobility providers. Contact info: Mike Usen, 206-436-0557, mike.usen@dksassociates.com

**Electric Commute Consulting** provides expert industry guidance based on over nine years of experience for electric vehicle charging infrastructure, transportation electrification programs and solutions for electric utilities, municipalities, public fleets and the private sector. Contact info: Dan O’Shea, 206-920-1477, electric.commute@outlook.com

**Envision Solar** patented and manufactures the EV ARC™, a transportable solar powered EV charging station that requires no permits, trenching or electrical connections. Each unit will deliver up to 225 e-miles daily, while charging up to six EVs. Contact info: Brian Gillespie, 310-514-1629, brian.gillespie@envisionsolar.com

**Envoy** is a leading provider of turnkey electric car share services, placing EVs and charging stations at residential multifamily dwellings and workplaces. Cars can be rented on-demand by the minute, hour or day. Contact info: Alan Bates, 310-922-6675, alane@envoythere.com

**EverCharge** is helping to make widespread EV adoption possible by building the world’s smartest charging solutions to service apartments, condos, and fleets. Contact info: CJ Best, 415-851-0956, cj@evercharge.net

**Leviton Manufacturing** Their promise: “At Leviton, we make the future happen.” They offer an extensive product line of commercial grade electrical, lighting, energy management and data networking devices. Contact info: Ivan Isaacson, 360-491-1451, IIsaacson@leviton.com

**Northwest Partners** brings new, innovative and sustainable products to the construction industry, such as the PowerFlex Adaptive Charging Network. The first electric vehicle charging system based on the most advanced load management technology available today. Contact info: Samantha Sawyer, 206-474-9171, samantha@synergy-investment.com

**Op Connect** provides turnkey, cloud-based software, payment processing, scheduling and maintenance services for persons using EV fueling infrastructure. They partner with EVSE manufacturers to provide seamless services and management tools. Contact info: Dexter Turner, 503-553-9106, dturner@opconnect.com

**Puget Sound Solar** designs, sells, installs, and services solar energy systems and electric vehicle charging stations. They help customers who are committed to clean energy make a difference by using solar energy. Contact info: David Locke 206-706-1931, dlocke@pugetsoundsolar.com

**Sema Connect** makes it easy to add smart EV charging to your place of business. They provide smart charging stations, help with site design and installation services, and even manage driver sign-ups. Contact info: Eric Smith, 303-373-5501, eric.smith@semaconnect.com
