PETITION UPDATE

Walk & Rally for our Salish Sea and Closing on 1,000 signatures on the Petition!

Puyallup Water Warriors & Redefine Tacoma
OCT 2, 2017 — It was a weekend to come together for our Salish Sea!
At the Peace Arch, Indigenous Leaders and people living north and south of the border came together at the Walk & Rally for our Salish Sea. Check out the event page on Facebook for beautiful live feeds of songs, teachings, and round dance.
The Stand with the Puyallup Tribe - No LNG Fracked Gas in our Salish Sea petition was launched Saturday and has 760+ signatures already. Praying for 1,000 by midnight. Let's keep sharing far and wide! Yehow!

PETITION UPDATE

Please Keep Sharing! Over 3,000 signatures, let's get to 10,000+ Stand with the Puyallup Tribe!

Puyallup Water Warriors & Redefine Tacoma

OCT 12, 2017 — This week Indigenous People's Day Celebrations brought people all over the country to Honor First Nations and their Call to Love, Protect and Restore our land and waters. We've all seen the news, both devastating and hopeful. More fires, more hurricanes, Orcas and Salmon in peril in the Salish Sea. At the same time, Scotland banned Fracking, another international bank pulled funding from all tar sands pipeline projects, solar farms are being built in the path of pipelines, and First Nations

Youth on the way to speak in Paris and Geneva.

We are in perilous times and it is easy to become overwhelmed. Standing together for our planet and our children's children gives us the courage and heart we need right now.

Hands Up and Thank you all for signing and sharing the Petition to Stand with the Puyallup Tribe and say No to LNG Fracked Gas in the Salish Sea. The next step is a meeting with Governor Inslee and State Attorney General Ferguson. We want the Governor, the State Attorney General, and all the permitting agencies to order a Stop Work Now! Let's send 10,000 signatures and more so they know We Stand with the Tribe.

How you can help:
1. Sign the petition if you haven't already. It takes 30 seconds.
2. Share the petition on Facebook, Twitter, and email.
3. Join the Facebook Event "Sign the Petition" and invite your friends to join and sign.
4. Take care of yourselves and loved ones so we can all keep our heads and hearts and hands up.

Much Love and Yehow!

Kwel'Hoy, We Draw the Line! Totem Journey Blessing in Tacoma WA

Puyallup Water Warriors & Redefine Tacoma
OCT 17, 2017 — Kwel'Hoy, We Draw the Line! Totem Journey with the Lummi Nation's House of Tears Carvers celebrates climate victories and connects us as we all work to protect our communities and land from fossil fuel expansions. At the Tacoma Washington blessing visit, Sightline senior research associate Tarika Powell spoke powerfully in support of the Puyallup Tribe's fight against the proposed PSE LNG fracked gas facility.

WATCH INTERVIEW WITH MASTER CARVER JEWELL JAMES, LUMMI NATION:

We have a very important hearing in Tacoma this Tuesday, October 17!
If you can attend this very important public hearing, please join us and help us save Tacoma from becoming the sacrifice zone for fossil fuel exports. Show up, speak up, and wear Red. #NoLNG253
Tuesday, October 17, 2017, at approximately 5:15 p.m.
The Pantages Theater
901 Broadway, Tacoma, WA

If you can't attend, you can send an email voicing your support for the Puyallup Tribe's Stop Work request on the LNG project to the City Clerk's Office at cityclerk@cityoftacoma.org by 1:00 p.m. on Tuesday, October 17.

Children and Governor Inslee Speak about Tacoma LNG - Please Sign & Share!

Puyallup Water Warriors & Redefine Tacoma
OCT 28, 2017 — Our Governor needs to hear from us. Don't let him compromise our children's future. Sign and share the petition - No LNG Fracked Gas in the Salish Sea!

WATCH CHILDREN SPEAKING on LNG HERE:
https://www.youtube.com/watch?v=_957zHPBIDU

On October 25, 2017 Governor Inslee spoke about on the proposed PSE LNG Fracked Gas Plant at a University of Washington forum:

Quote "...Governor's have to follow the law….
the County and City are the principal permitting agencies, not the state….
so that is the original permitting authority,

...we need to follow the law on this….
I'm going to do a lot more looking into this to see if they are following the law as they should." Unquote

This project's' failure to meet required laws is well documented (see letter below). Let's make sure Governor Inslee is informed and stops this disastrous project Now.

Sign & Share Today! Thank You!

PSE Continues to Build LNG Fracked Gas Tank in Violation of Permits

Puyallup Water Warriors & Redefine Tacoma

DEC 3, 2017 — Puget Sound Clean Air Authority (PSCAA) staff member says "PSE is building at their own risk". PSE has been constructing in violation of permit conditions for months. The Puyallup Tribe's request for a Stop Work has been ignored by all agencies to date. PSE still needs the essential Notice of Construction (NOC) permit from PSCAA.

Now PSE is asking PSCAA to forgive their permit violations and issue this final operational permit.

PSCAA has held two informational meetings and citizens and tribal representatives came out in solidarity. PSCAA staff were unable to answer multiple questions on toxins, breach events, explosions, and other critical health and safety issues. We are urging PSCAA to answer our questions in writing and hold another informational meeting before the formal comment period and public hearing process begins. These dates have not been announced yet.

We will be calling on you in the upcoming days to write letters to PSCAA to deny the NOC permit and stop this disastrous project. Please keep sharing the petition everywhere and stay tuned. Your support is essential and we thank you!

Together we will protect our communities and the Salish Sea!

Yehow!

BREAKING NEWS: Water Protectors Lock Down at Tacoma LNG Site

Puyallup Water Warriors & Redefine Tacoma

DEC 11, 2017 — Friends, Early this morning, two water protectors locked themselves to a crane 60 feet high at the LNG build site in the Port of Tacoma. They are participating in direct action to call attention to a dangerous facility that is being built without permits, and against the wishes of the Tacoma community.

You can watch a live feed of the action and leave messages of support here: http://bit.ly/2jOirsj

Gates, Cranes, and Acquittals!

Puyallup Water Warriors & Redefine Tacoma
DEC 17, 2017 — It was a huge week for Water Protectors on the ground and in the courtroom in Tacoma. As PSE continues to build without permits Water Protectors are putting their bodies on the line to stop construction on the massive 8 million-gallon fracked gas LNG tank. Tomorrow morning, thousands of Water Protectors from all over the northwest will gather for a peaceful action at the gates of Puget Sound Energy's fracked gas construction site. We are calling on Governor Inslee, the State Attorney General, and all permitting agencies to honor the Puyallup Tribe's Stop Work request and intervene on the project's permit and treaty violations. Can you come stand with us? Can you come and pray with us? It's all about prayer, it's all about the water. Click on the Facebook event page to learn how to join and support tomorrow's huge Block the Gates Action at the construction site.

Super 6 Grandmothers Acquitted on all Counts
Marilyn Kimmerling and Cynthia Linet, the final 2 of the Super 6, were found NOT GUILTY of charges from when they tied down to an auger at LNG site last May! Puyallup Elder, Ramona Bennett, testified on the fact that the "land" where the PSE LNG facility is being built is actually aquatic tidelands estuary and part of the Puyallup Tribe's usual and accustomed fishing and hunting grounds, protected under Treaty. Since the Treaty, others have filled the tidelands to create "land" where the PSE LNG facility is now being constructed. The jury acquitted the two grandmothers water protectors of all charges.

Breaking: Hundreds gather to block construction at LNG site

Puyallup Water Warriors & Redefine Tacoma

DEC 18, 2017 — At 5:30 am this morning, several hundred people gathered outside all three entrances to the construction site for Puget Sound Energy's fracked gas LNG facility. Several water protectors chained themselves together at the gates and supporting water protectors stood in solidarity and song. When news of the devastating train wreck 20 miles to the south broke, leaders immediately led everyone in prayer for the victims and their families. The day continued peacefully in prayer and solidarity. One activist and one elder were arrested – we will keep you updated on their situation.

You can see several live feeds of the action on Native Daily News' Facebook page. Here is one example: http://bit.ly/2BwvxCe.

Check out more of Elliot Stoller's beautiful photos of the event (pictured above): http://bit.ly/2CWX6oi.

This is the fourth of several direct actions we are taking to raise awareness and bring a stop to construction on this dangerous facility that is being built in violation of federal and state permits. We are deeply grateful for your support along the way. Thank you for sharing!

A New Year to Stand Together - No LNG in Tacoma!

Puyallup Water Warriors & Redefine Tacoma

JAN 2, 2018 — Many blessings and thanks to you all for supporting our petition to stop the PSE fracked gas LNG facility in Tacoma. We are close to 50,000 signers! Your support strengthens us as we stand with the Puyallup Tribe to protect our citizens and our Salish Sea here in the Pacific Northwest.

Together we have brought this dangerous project to national attention in just a few months. Governor Inslee has promised to look at the environmental review process for irregularities. We have met with assistant State Attorney General and brought our concerns to their office. TheAffiliated Tribes of Northwest Indians passed a resolution opposing the siting of the LNG facility in Tacoma. We have support from Sierra Club, 350 Seattle, 350 Tacoma, Tacoma Direct Action, Native Daily Network, Protectors of the Salish Sea, and many more.

Things are moving fast and we will be calling on you for support very soon. There are many ways you can make a difference: joining us in prayerful actions; writing letters; and always sharing the petition far and wide. Here are some of the upcoming events and important dates.

1/8 Monday - Climate Countdown Day at Washington State Capitol, Olympia WA https://www.facebook.com/events/1969448093273005/
1/20 Saturday - No LNG Contingent at the Women's March, Olympia WA https://www.facebook.com/events/265921033938487/
1/23 Tuesday - Native American Lobby Day, Washington State Capitol, Olympia WAhttps://www.facebook.com/events/135162240514541/
1/25 or soon after - Beginning of Comment Period for Puget Sound Clean Air Authority (PSCAA) review of PSE LNG Clean Air Permit - We will need everyone's comment letters. Look out for an update with a letter template soon.

Together we are powerful and we will protect our land and water.

What is Liquified "Natural" Gas or LNG?

Puyallup Water Warriors & Redefine Tacoma

JAN 5, 2018 — Friends,

One of the biggest challenges we've encountered in working on this campaign is how to talk about a very complex and at times technical project in a way that is easy to understand. As part of our work to spread this outside of Tacoma, we're going to start a series of educational petition updates to make sure that you all – our supporters! – understand why we are trying to stop this project, and can help us get the word out.

For each update, we'll pick a different brief topic to cover. If you have specific questions, feel free to leave them in the comments! Today, we're answering the question: What is LNG?

LNG stands for liquefied natural gas. It's a liquid form of a fossil fuel that was once thought to be a "green fossil fuel" but we now know is a huge contributor to climate change. It is extracted through fracking, and stored at -260 degrees Fahrenheit to maintain it in a liquid form.

This LNG facility would require the extraction of more fossil fuels and necessitate further investments in fossil fuel infrastructure. In other words, it would cement us into a future of climate change. We need to stop this facility.Fossil fuels must stay in the ground if want our children to have a safe planet to live on.

Will you help us spread the word? Share the above image on Facebook by clicking here: http://bit.ly/2CvuJNB.

We'll be back soon to tell you how this gas is being extracted – through fracking – and why that part of the process is harmful for our health and a risk to our safety.

Prayers, Tarpees, and Climate Action at Washington State Capitol

Puyallup Water Warriors & Redefine Tacoma

JAN 11, 2018 — 350 Seattle reports on Climate Countdown: Day 3: "...300+ of us from across Washington State descended on the State Capitol in Olympia to begin the Climate Countdown. At the same time, an Indigenous-led encampment of dozens of people centered around four "tarpees"' (tarp-covered teepees) on the lawn in front of the Capitol, which had been set up in the pre-dawn hours to protest the construction of the new Puget Sound Energy Tacoma LNG facility and the new Trans Mountain pipeline, and to stop net pen fish farms. The encampment is still holding.

We are not done till the legislature meets our demands--that its members ban all new fossil fuel infrastructure in the state, and that they enact legislation to spur the State to 100% renewable energy within the next ten years."

Our demands include an immediate Stop Work on the PSE fracked gas LNG facility in Tacoma. Check out the amazing live streams and videos on this on-going action at the Washington State Capitol and find out how to get involved at 350 Seattle.

Opposition Continues to Mount Against PSE's Fracked Gas LNG in Tacoma!

Puyallup Water Warriors & Redefine Tacoma

JAN 20, 2018 — We are grateful for all people standing up to say No to PSE's proposed fracked gas LNG facility in Tacoma. Your signatures and comments are making a difference and our voices are being heard! The National Congress of American Indians (NCAI) and Affiliated Tribes of Northwest Indians (ATNI), and the Puyallup Tribe of Indians have all passed resolutions opposing the PSE LNG project. Democratic representatives in Washington State Legislative Districts 43, 32, and 36 have all passed resolutions to support the Puyallup Tribe and stop PSE's LNG facility. Seattle City Council has voted unanimously to consider a similar resolution. Their final vote will be on Monday, January 29.

Keep standing in peace and prayer! Keep signing and sharing the petition. Our hands go up to all fighting the LNG injustice!

Prayers, Unity, and a Victory!

Puyallup Water Warriors & Redefine Tacoma

JAN 26, 2018 — Tuesday 1/23/18 - Northwest Tribes gathered at the Washington State Capitol for American Indian Lobby Day. A Puyallup Tribal elder prayed over your signatures and messages before they were delivered to Governor Inslee's office. Afterwards we gathered in the Rotunda for ceremony, drumming, and prayer. Standing Rock Rosebud Camp elders honored the Water Warriors with the gift of a Mni Wiconi tipi from Standing Rock. It was a powerful and beautiful day.

Wednesday, 1/24/18 - We all woke to wonderful news. Puget Sound Clean Air Agency (PSCAA) ordered a Supplemental Environmental Impact Statement (SEIS) to be prepared before they will review PSE's permit for the proposed PSE LNG facility. The SEIS will analyze the projects impact on air quality and greenhouse gases (GHG). The SEIS has to address emission impacts upstream and downstream of the facility throughout the entire fuel life cycle. This includes GHG impacts from fracking for the gas that will feed the facility, leaks along the pipeline, emissions and flares at the facility, leaks during fueling and transport, and finally emissions from burning. The Puyallup Tribe issued a press release repeating their request for an immediate Stop Work Order on the LNG facility.

We are elated and ready for the work ahead to stop this dangerous project once and for all. We are allies united in prayer and dedication to protect and restore our Mother Earth. We are grateful for each and every one of you. Please keep signing and sharing. Yehow!

Call to Action! Please Email or Call Seattle Council Members by Tomorrow Wednesday 2/21

Puyallup Water Warriors & Redefine Tacoma

FEB 20, 2018 — Thank you for all your calls and emails to Seattle's City Council last month. It's time for another round!

Last month Council Member Kshama Sawant introduced a NoLNG Resolution. Instead of voting on it directly, it was sent to a committee that Council Member Debora Juarez chairs. Juarez committed to "strengthening" the Resolution.

We know PSE LNG is bad for the climate, is in violation of Puyallup treaty rights, and poses a danger to the community's health and safety. Seattle City Council is under pressure to pass a weaker version of the Resolution. Please write the Committee TODAY to support the original Resolution:

1. Oppose PSE's LNG, don't merely address or consider it.
2. Don't subtract from CM Sawant's original resolution, add to it to make it stronger.
3. TOTE has other options to meet air quality emission requirements.
4. Urge the Puget Sound Clean Air Agency (PSCAA) to reject PSE's application for a permit for the proposed LNG facility and request 5. Mayor Jenny Durkan seek every legal opportunity to use the influence of the Mayor's position on the PSCAA Board of Directors to advocate for that permit to be rejected.

Why is Fracking Harmful?

Puyallup Water Warriors & Redefine Tacoma

FEB 25, 2018 — Puget Sound Energy's proposed LNG refinery in Tacoma will require a steady flow of natural gas, a fossil fuel which is extracted through a dangerous and harmful process called hydraulic fracking.

Fracking involves injecting water, sand, and chemicals into the earth at high pressure, fracturing the rock and giving the process its name. This causes gas to flow out of the well. The above graphic shows just part of a fracking field with multiple fracking wells.

According to the US Energy Information Administration, nearly 70% of today's natural gas comes from fracking. There is nothing "natural" about it.

Fracking uses enormous quantities of water, requiring 2 to 16 million gallons of water

to frack one well. Fracking can leave tens of thousands of gallons of chemical fluid in the ground, threatening our water sources with toxins. This directly impacts the health of those living near fracking wells. Recent studies show increases in respiratory problems, premature births, pregnancy complications, and low birth weights in communities where fracking fields have been sited.

You can read additional critical health, environmental impact information and fracking graphics at this link: http://bit.ly/2CeQ8OE
You can read more about how fracking is connected to this project through Tarika Powell's work at Sightline: http://bit.ly/2zY7z0w.

We cannot allow Puget Sound Energy to put our community at risk, nor will we tolerate risking the health of people living near the fracking wells. Our communities are connected!

Share this link if you agree – Puget Sound Energy's fracked gas refinery must be stopped. http://bit.ly/2F6AUfA

Urgent Action Needed to Save Our Coasts from Offshore Drilling!

Puyallup Water Warriors & Redefine Tacoma

MAR 5, 2018 — The Trump administration has announced plans to vastly expand offshore drilling in the Atlantic, Pacific, Gulf of Mexico, and Arctic Ocean starting next year (2019). This extreme proposal opens over 90% of the Outer Continental Shelf to

new drilling and puts our nation's coastal communities, beaches, and marine ecosystems at risk of a catastrophic oil spill. The Bureau of Ocean Energy Management (BOEM) for 2019 - 2024 would open thousands of miles of U.S. coastline to oil drilling, including regions such as the Atlantic and Pacific that have been protected for decades from this dangerous practice http://bit.ly/2nZR2F7. No Means No! Demand PSE Stop Work Now!

Puyallup Water Warriors & Redefine Tacoma

MAR 27, 2018 — No Means No! Today we demand that construction stop on Puget Sound Energy's Tacoma LNG refinery.

Although it still lacks key permits, is in violation of the Medicine Creek Treaty, and faces ever-growing public outcry, PSE is building its massive fracked gas storage and refinery on the Tacoma Tideflats full speed ahead.

PSE isn’t even gambling with its own money: shareholders expect residential customers like you and me to pay a huge chunk of the bill for a facility designed primarily to sell fracked gas as a transportation fuel to industrial customers for profit.

The Puyallup Tribe stands in firm opposition to this dangerous and environmentally disastrous project. Many stand with them; petitions and resolutions against the project have been signed by the 14 Affiliated NW Treaty tribes, The City of Seattle, numerous Washington State democratic caucuses and legislative districts, the Washington State Democratic Central Committee, and over 53,000 concerned citizens.

Governor Inslee's office has received copies of all the resolutions and petitions, yet has not given any public response.

Governor Inslee needs to honor the treaties and put the health and safety of our communities before the interests of corporations. Please call or email Governor Inslee this week and demand that he issue an immediate Stop Work Order on the PSE LNG facility. Governor Inslee's phone and email: (360) 902–4111

No Permit, No Problem! Longhouse constructed at PSE Headquarters!

Puyallup Water Warriors & Redefine Tacoma
APR 2, 2018 — PSE does not have construction permits for their 8 million gallon fracked gas LNG tank -- and neither do we for our beautiful replica of a traditional longhouse, modernized with solar panels and wind generator! We filed for our permit last week - the review process takes over 70 days. We thought we'd get a head start like PSE so we've constructed our lovely longhouse blocking the main entrance to PSE's corporate headquarters in Bellevue this morning.

What's the difference? One is a fracked gas bomb with a 3.5 mile blast zone, constructed on a superfund site, and fed by toxic fracked gas that poisons groundwater, causes earthquakes, and leaks methanol.

The other is a beautiful representation of healthy sustainable life for our children's future.

Please call Governor Inslee at 360-902-4111 and Attorney General Ferguson at 360-664-2162 and ask them to issue a Stop Work Order on PSE's illegal construction NOW!

Two Juries. Two Verdicts. INNOCENT

Puyallup Water Warriors & Redefine Tacoma

APR 9, 2018 — Last week a Tacoma jury found Steve Way innocent of criminal trespass. Steve is one of the two heroes who locked themselves to the crane at the construction site of the PSE LNG facility on December 11, 2017.

This is the second jury to validate the Puyallup Tribe's ownership and Treaty-protected fishing/harvesting rights in the tidelands. Brilliant attorney Blake Kremer, along with tribal elder Ramona Bennett and Puyallup member Dakota Case were astounding, powerful expert witnesses and made a crystal clear case for their sovereignty and for Steve Way's right to be on their land.

Jurors were strongly affected by their testimony and expressed Ramona and Dakota's words were important to their decision. Also after the trial, several of the jurors expressed they wanted to stand with Steve and the community in some way. As more and more people learn about Treaty rights and violations, and about the dangers of fracking and LNG, our community grows ever larger.

Dakota is traveling today to Washington D.C. for the Supreme Court Hearing on this case. Tomorrow, April 18, The Supreme Court will hear arguments in Washington v. United States, a case pitting the State of Washington against the United States and 21 Northwest Native American Tribes. This case is an imminent danger to our endangered salmon and the Treaty Rights that have protected them. Washington State filed this case decades ago because the state did not want to pay to fix the culverts that have kept salmon from their spawning streams. The Supreme Court decision will affect the future of wild salmon and set modern day precedent regarding the scope of Treaty Rights and the protection of natural resources.

Now is the time to stand with the Tribes and honor their leadership and support their Treaty Rights. Treaty Rights are the law of the land and are used to protect the land and water for future generations.

More Permit Review + No Customers = Trouble for PSE's Fracked Gas LNG

Puyallup Water Warriors & Redefine Tacoma

MAY 17, 2018 — Local Tacoma newspaper reports PSE's fracked gas LNG project could be in jeopardy. Growing opposition cannot be ignored by mainstream media anymore!
"Tacoma LNG Plant has 'Potentially Significant' Permitting Issues. Opening could be Delayed

BY CANDICE RUUD
cruud@thenewstribune.com
May 11, 2018 09:05 AM
Puget Sound Energy's plan to open its Tacoma liquefied natural gas plant in 2019 could be in jeopardy.
An additional environmental review of the plant ordered in January by the Puget Sound Clean Air Agency has led TOTE Maritime, which would be the plant's main customer, to delay the conversion of its ships' engines to run on LNG fuel. Permitting delays and the extra review also have caused a state commission to cast some doubt on the project.
Port of Tacoma commissioner Dick Marzano said this week the additional reviews probably have the parties holding their breath." Read the entire article here: https://bit.ly/2k4OZhw

Hands Up for Standing with Us to Protect the Salish Sea!

Puyallup Water Warriors & Redefine Tacoma
MAY 23, 2018 — Thank you for all your support through this battle against PSE's fracked gas LNG. We launched our petition last fall with Native Daily Network's powerful video "No Fracking Way". 60,000 signatures later, we've come a long way! The truth about fracking, LNG, and PSE's dangerous project continues to be exposed. Indigenous leadership, including Affiliated Tribes of Northwest Indians and National Congress of American Indians, stand with the Puyallup Tribal Council and have passed resolutions strongly opposing PSE's project. Dozens of organizations around Washington State have passed No PSE LNG resolutions in support. Our Clean Air Agency has required PSE to conduct additional environmental review on greenhouse gases, placing a delay on the project. TOTE is also delaying their conversion of their ships to LNG. We are not done with the Governor's office, the Attorney General's office, and all agencies involved with permitting this project. We stand united to protect our Earth and Water. There will never be LNG on the Salish Sea!

Please keep sharing this petition with your family and friends and encourage them to sign. Together we can shut this disastrous project down. YEHOW!

Lummi Nation Totem Journey Just the Beginning to Free Captive Orca Tokitae

Puyallup Water Warriors & Redefine Tacoma

MAY 31, 2018 — From Seattle Times Article - "Lummi prayers, Songs at Seaquarium Just Start of Effort to Free Captive Whale". Read full article here: https://bit.ly/2xskAmJ:

"After more than 3,000 miles, Lummi Nation tribal members delivered their songs and prayers for the release of Lolita the southern-resident killer whale at the Miami Seaquarium where she has been kept for 47 years.

The Seaquarium would not allow tribal members any closer than the public sidewalk outside the facility where the whale performs twice a day for food.

Undeterred, tribal members on Sunday walked in procession to the Seaquarium from a nearby park through a subtropical storm lashing wind and rain. At Seaquarium, they spoke to the whale in their language, and sang to her. As they sang, the sun came out.

A member of L Pod, the whale was taken from her family in Penn Cove and sold to the theme park. About a third of the southern-resident population was taken from Puget Sound and sent to theme parks all over the world during the 1960s and 1970s. The critically endangered southern-resident orca population has never recovered from the loss.

'In our language, qwe lhol mechen translates to ‘our relative under the water,’" said Jay Julius, chairman of the Lummi Nation. “She is a member of our family, and it is our sacred obligation to bring her home to the Salish Sea.' To the tribe, the campaign is about more than one whale. The tribe’s Sacred Sea campaign is also an effort to bring attention to the need to return her home waters to health.

'Our entire way of life has been threatened by bad policy that has upset the entire ecosystem of the Salish Sea,” Julius said. “The salmon, the waters, the marine life — all of it is in delicate balance, and we need better policy that protects it. We are only as healthy as the salmon, the waters and the lands we rely on to nourish and protect us.’"

Powerful Words from the Puyallup Tribe

Puyallup Water Warriors & Redefine Tacoma
JUN 4, 2018 — "Prayer Ceremony kicks off ‘Are You in the Blast Zone?’ Campaign
On March 9, 2016 at 1:04 a.m. a fireball exploded inside Mr. Gyros in Seattle’s Greenwood neighborhood. The blast leveled three businesses and sent nine firefighters to the hospital. Windows shattered throughout the neighborhood and buildings shook to their foundations for blocks around. The cause was a leak in an old Puget Sound Energy natural gas pipeline.

Now imagine a form of natural gas 600 times more concentrated sitting inside an 8 million gallon tank within a mile of several preschools and daycare centers. That’s exactly the situation at Puget Sound Energy’s liquefied natural gas (LNG) storage facility under construction on the Puyallup River Tideflats.

On Wednesday, May 23, members of the Puyallup Tribe, along with a coalition of environmental groups, met at Chinook Landing Marina, across from the LNG plant, to launch a new awareness campaign called, “'Are you in the blast zone?'”

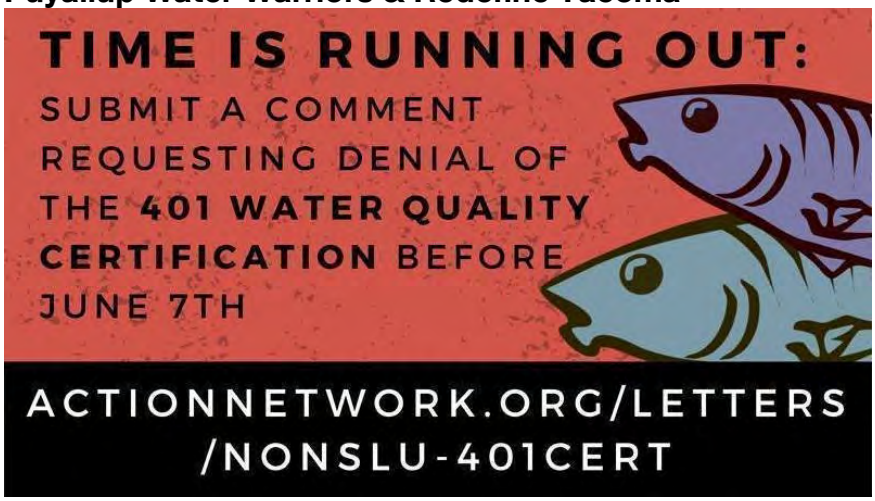
Urgent! Comments Needed to Stop PSE's Fracked Gas Pipeline Expansion in N. Seattle!

Puyallup Water Warriors & Redefine Tacoma



JUN 6, 2018 — Dear Friends,

Even as we are fighting to end fracking and our dependence on fossil fuels, Puget Sound Energy wants to double the amount of fracked gas going to north Seattle homes. Expanding the existing pipeline puts 15 streams at risk as well as the threatened salmon who spawn in them. And most of the route runs through an

EPA-designated aquifer, putting critical water resources at risk. Sound like a good idea? Not by a long shot!

We have a comment page ready for you: https://bit.ly/2JxyNDy
Get your comment in by the Washington Department of Ecology deadline on Thursday, June 7th! We are asking WDOE to deny the project's 401 Water Quality Certification. https://bit.ly/2JxyNDy

Last month when the Sightline Institute broke this story, they found that this project:
Causes a 3% increase in state carbon emissions by itself, when we should be doing all we can to reduce them;
Has an unnecessary 63% increase in fracked gas capacity; current capacity isn't maxed out;
Disrupts 15 streams, including Little Bear Creek, Evans Creek, Tambark Creek, Great Dane Creek and their tributaries;
Harms already threatened Chinook salmon, which are essential to the survival of our local orca population;
Results in piecemeal growth in fracked gas infrastructure that slows our transition to a fossil free future.

Let the Department of Ecology know, this project's negative impacts on climate and water quality can't be ignored any more than its long-term impact on our climate can! Together we can stop this, Sara, Bob, Stacy, Kaytlyn, David and the whole NSLU team

Historic Win for Pacific Northwest Salmon!

Puyallup Water Warriors & Redefine Tacoma

JUN 23, 2018 — "Today is a great day for salmon, tribes, treaty rights and everyone who lives in western Washington. This Supreme Court ruling means more salmon for everyone.

It will open hundreds of miles of high-quality salmon habitat that will produce hundreds of thousands more salmon annually for harvest by Indians and non-Indians.

The Supreme Court has affirmed a common-sense ruling that treaty rights require there to be fish available for harvest. It affirms that the state can't needlessly block streams and destroy salmon runs.

The main cause of the salmon's decline is that we are losing habitat faster than it can be restored. The ruling will result in a net gain of habitat that salmon badly need.

Today's ruling shows that our treaties are living documents. They are just as valid today as the day they were signed..." - Northwest Treaty Tribes Statement, dated June 11, 2018.

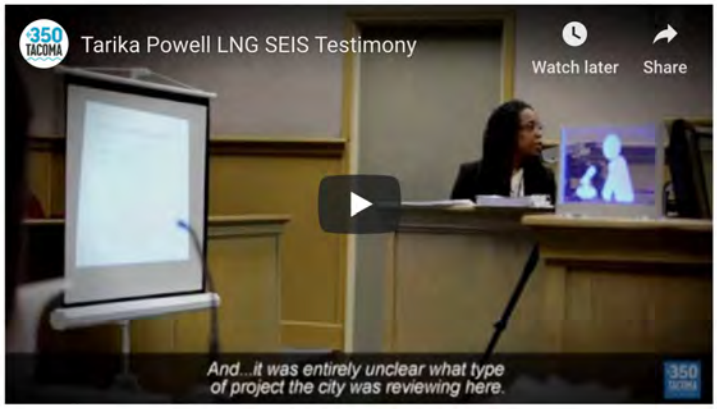
DANGER! Environmental Review Inadequate for PSE'S LNG Blast Zone!

Puyallup Water Warriors & Redefine Tacoma
JUN 24, 2018 — Sightline Institute researcher and environmental law expert Tarika Powell testifies that the Environmental Impact Statement (EIS) produced by the City of Tacoma for the Puget Sound Energy (PSE) Liquefied Natural Gas (LNG) project is false and misleading and "the most incompetent" she has ever seen.

WATCH TARIKA POWELL, SIGHTLINE TESTIFY:
https://www.youtube.com/watch?v=GPWgtr3lUxE



The worst areas of deficiency in the EIS are greenhouse gases, health & safety, and hazardous materials. Puget Sound Clean Air Agency is requiring an Supplement EIS to examine the impacts of greenhouse gases associated with the project from the fracking wells to final burning of LNG. We need a thorough review of the dangers and hazards associated with PSE's proposed LNG facility, including the Blast Zone.

As Lead Agency, it is the responsibility of the City of Tacoma to initiate and oversee a

Supplemental EIS (SEIS) to provide adequate review of the serious safety hazards posed by this unnecessary facility. But they have not yet done so, despite repeated requests.

"How Dakota Case and the Puyallup Nation are Protecting the Salish Sea"
by Lauren Reid, the online editor for Greenpeace, USA

WATCH GREENPEACE INTERVIEW WITH DAKOTA CASE:
https://www.youtube.com/watch?v=JVOvdg5MPbQ

Link to full article here: https://www.greenpeace.org/usa/stories/how-dakota-case-and-the-puyallup-nation-are-protecting-the-salish-sea/

Joining Greenpeace on board the Arctic Sunrise, Dakota Case has been a life-long activist, now fighting against a grave risk to his home, the water, and his tribe's way of life.

Dakota Case on board the Arctic Sunrise, pointing out the U.S. Oil Refinery in the Port of Tacoma.

Dakota Case is from an urban tribe. This is not by choice, but because the city of Tacoma, Washington was built in and around the home of his ancestors — the Puyallup Nation. Dakota, raised by life-long activists, has been protecting the Salish Sea his whole life and the region is deeply connected to who he is. Joining Greenpeace on board the Arctic Sunrise, Dakota has been raising awareness around the construction of the Liquified Natural Gas Plant (LNG) in the Port of Tacoma, and the proposed Trans Mountain pipeline expansion project — both presenting a grave risk to his home, the water, and his tribe's way of life.

The Arctic Sunrise has been following the route of tar sands tanker and barge traffic from the Trans Mountain pipeline as part of the work to stop pipelines for good. Some of this traffic goes to the U.S. Oil refinery in Tacoma, Washington. Dakota describes why he is fighting the intrusion of fossil fuels in his home, and what is at stake for the future of the region.

Lauren Reid: Can you tell us a little bit about who you are and why you are here on the Arctic Sunrise?

Dakota Case: My name is Dakota Case and I am a Puyallup Water Warrior. I am on the Arctic Sunrise today to raise awareness on the NoLNG253 campaign. I was born on our land in Tacoma, on the Puyallup Territory. I am also here today to stand in solidarity with Greenpeace as they work on the Kinder Morgan pipeline campaign because it affects our community because the tar sands come straight from our land. I think we all have the same goal of a sustainable world for future generations.

For more information on the NoLNG253 Campaign, head here.

Dakota Wayne Case, Puyallup Tribe of Indians, points out where the liquified natural gas facility is proposed to be built in Tacoma. The Greenpeace Arctic Sunrise sails the Salish Sea off the Washington coast near Seattle, Tacoma, Bellingham, and the San Juan Island. The ship is following the route that would experience a seven-fold increase in tar sands tanker oil traffic if the pipeline expansion is completed.

LR: You are a new skipper for the Puyallup Tribe. How does a canoe journey shed light on the Trans Mountain Pipeline Expansion and the LNG Facility?

DC: Honestly it connects all the pieces to the puzzle — the Lummi and Swinomish territories all came together with this. We have a protocol where each tribe shows their weakest side when they come forward to ask leaders and elders to come on shore. It's a way to show that you come peacefully. So together this journey is called "Honor the Medicine", and each tribe will bring medicine from their own territories and dump them into the waterway in front of the LNG facility. Afterward, they'll tell their own story of what they dumped and why, and the significance of this medicine to their people. The LNG facility is a threat to our way of life, and a threat to the salmon here. It's part of our creation story that when our creator blew life into us, the creator gave an option to go to the water or stay on land — water became the salmon people, the Coast Salish people, and in that moment of splitting, we and made a sacred promise to always protect the salmon and they would always come and nourish us.

LR: There is a refinery that takes tar sands to your territory. What do you see at stake for your community if this tanker superhighway comes to fruition?

DC: It would be a devastation. We're already one of the most polluted ports in the United States.

LR: Can you describe what these barges and tankers are like?

DC: They anchor the barge right off the point where were start our canoe journey, and we regularly go by it in a canoe. It's one of the ugliest things you can imagine. They look like big empty ships but the tar sands are stored below deck. The Port of Tacoma has one of the nastiest stenches too. We protested in the port for 2 weeks straight, and it took our bodies almost a month to come back to normal — we had to detox from it. It messes with my head sometimes too, because I think about the future for my kids. My sons will have to go to war for water, they don't know what it's like to not breathe dirty air. I don't know how this is sustainable for future generations.

Dakota Wayne Case, Puyallup Tribe of Indians, on board the Arctic Sunrise as the ship displays a banner message near the US Oil facility in Tacoma.

LR: How did you come to be involved with the Water Warriors? What was the path you've taken to protect the Salish Sea?

DC: I was raised this way. I am a 4th generation of the American Indian Movement, and Janet McCloud was my great-grandmother and a founding member of this movement. She inspired me a lot. She was named the woman of the year in the Pacific Northwest, and was known as "the only woman who could hold the community in her hands." I feel like I'm honoring her by passing on her teachings and lessons. So with the Water Warriors Movement, and being a founding member of the Water Warriors council, we found it necessary to come together as a group of tribal members to protect our environment and to awaken our people from Tacoma to the injustice that's upon us.

As a founding member of the Puyallup Water Warriors — Dakota will be a skipper in a month-long canoe journey to honor his ancestors and way of life, traveling their highways in the Salish Sea, from the Lower Elwha to Tacoma — singing, telling stories, and protecting his Nation's way of life against the unending intrusion of fossil fuels in his home. Follow and support their work!

Puyallup Tribe Hosts 2018 Canoe Journey

Puyallup Water Warriors & Redefine Tacoma

JUL 23, 2018 — Canoe Journey is a Native American traditional canoe gathering that takes place along the northwest Pacific coast. Each year a different Tribe hosts the Canoe Journey. This year the Puyallup Tribe is hosting. The name is "Power Paddle to Puyallup" and their theme is "Honoring our Medicine."

Canoe Families from Tribes all around the region are paddling along traditional routes, stopping at Tribal landings along the way for rest, sharing meals, and protocol. On July 28 Canoe Families will be welcomed ashore at the Puyallup Canoe Journey Landing followed with a week of sharing songs, dance, meals, and protocol.

From Bill Sterud, Puyallup Tribal Chairman:
"...Reclaiming our traditions is a commitment we practice every day to make sure that our children, and their children, can enjoy these waters after we are gone.

Today, the tips of our canoes touch the sand of beaches polluted by chemicals from upstream contamination. These same pollutants poison our tide flats and seep into our shellfish beds. Just like
tribes across the nation, we live with the result of declining fish supply as salmon habitat gets degraded and salmon passage is blocked by roads. With every new development, like the Liquid Natural Gas
plant, we are faced with a battle to protect our waters, our lifeforce, and our medicine.

We gather with our fellow tribes during the journey to honor and celebrate our shared bond. We are all working to preserve the ways, lands, and waters of our ancestors. And we do this because it is sacred to us."

Tahlequah, We Are So Sorry - Native Daily Network Reports on Orca Emergency

Puyallup Water Warriors & Redefine Tacoma
AUG 5, 2018 —
Thank you Native Daily Network for this powerful article! Please read and take ACTION to Save Our Southern Resident Orcas. Petitions to sign and phone calls to make are listed below the article. Tahlequah and her family need all of us to Act Now!

WATCH NATIVE DAILY NETWORK VIDEO OF TAHLEQUAH:
https://www.youtube.com/watch?time_continue=1&v=QQujl1mBw80

Native Daily Network - August 4, 2018 http://www.nativedailynetwork.com/2018/08/tahlequah-we-are-so-sorry/

"TAHLEQUAH, WE ARE SO SORRY

Tahlequah is a life giver. She is a mother. She is grieving heavily after her baby died just a few minutes after she gave birth 10 days ago. Since that loss, Tahlequah – an Orca who is also known as J-35 – has been carrying her child with her. Tahlequah and her pod are currently traveling north through the Strait of Juan de Fuca, which connects the Puget Sound to the Strait of Georgia. The Strait is also crossed by the international boundary between the U.S. and Canada.

J POD IN DISTRESS
Tahlequah is part of the Southern Resident Killer Whales, who are listed as endangered in both the U.S. and Canada. This clan is made up of 75 Orca divided into 3 pods – J(23), K(18) and L(34.) That figure marks a decline in their population by 23 in the past two decades – over 20%. To add to the concern, the now dead calf was the first that was born alive in the clan within the last 3 years.

Their diet is 97% Salmon and it is believed that the decline in the number of fish is one of the driving factors challenging the health of these Orca. Pollution is another big worry with the Northwest Orca among the most contaminated marine mammals in the world. To add insult to injury, human activity on and in the water is also having a negative impact. Marine noise is interrupting the echolocation that the Orca use to hunt.

The fish decline has been in sharp focus this week due to another member of this ailing pod. J50 is emaciated. So poor is her condition that the back of the 4-year-old Orca's cranium is visible. There are also worries that a white patch on the back of her head may be an infection. A rescue effort is underway for J50 but there is a fear that she may only have a couple of days left. The efforts involve feeding her live Chinook Salmon – her regular diet – to both nourish and hydrate her.

The Pod also took a huge hit in 2016 with the loss of their matriarch. J2 – known as Granny – thought to be the oldest known Orca in the world, with some estimates putting her at 105 years old had run the Pod for many years.

BLACKFISH

Orca are smart, each group having their own distinct dialects. They are self-aware, being able to recognize themselves in a mirror. The Orca is even known to work together with humans, although the natives of the Salish Sea have known this all along.

There is a sacred relationship between the coastal indigenous and the 'Blackfish'. All of those indigenous tales of the blackfish acknowledge that relationship That the Orca communicate with us is of little doubt to experienced tribal fisherman and whale watchers.

That relationship is a driving force behind the Lummi Nation's endeavors to bring Tokitae home. She is another blackfish who was stolen from the L pod 47 years ago. Back then 45 of this clans children were kidnapped and sold to marine parks for entertainment. Destined to live their lives in small chlorinated pools.

Tokitae is the last of that stolen generation still alive. Her mother, L25 – or Ocean Sun – is 83 years old and there are hopes that mother and daughter can swim together again.

The Lummi word for Orca is 'qwe lhol mechen', which means the people/relative under the sea. There is a First Nations belief that humans who drown at sea become Orca and some tribes believe that chiefs can reincarnate as one. Tlingit stories tell of a powerful deadly force of nature that terrifies every creature except man, who she/he is said to look after.

What is clear today is that it is our time to look after the Orca – or at least stop hurting her. It is our time to listen.

MESSAGE AND HEARTBREAK

Orca are known to grieve when they lose a pod member but what is happening with Tahlequah is incredibly unusual. Fellow members of the Pod have started to help the mother by taking shifts holding her baby. It's a heartbreaking sight.

For some, this is a family in mourning and their privacy should be respected. One person told us that 'we've done enough damage'. Others think that the pod may be taking the baby to a specific place to lay it to rest.

Many, though, believe that Tahlequah and her family are sending us a message. This idea seemed to resonate most strongly with the women we spoke to. We were told that, as fellow live givers, they understood the message being conveyed clearly. 'They are showing us what is happening to them.' we were told. 'They are crying out for help.' 'They are showing us that this is what is going to happen to us.' 'Mother to Mother, we understand' they said. The women need to come together to help find the solution here.'

DISTURBING SIGNS
Whatever your opinion, we can all agree that this is a tragic and heart-wrenching event. Tahlequah's journey of sorrow presents as a very disturbing sign for the health of the area's waterways. The proliferation of pollutants from heavy industries, sewage and storm runoff presents a huge challenge to the ecosystem here. These are exasperated by the destruction of or obstruction to salmon spawning grounds. The salmon get smaller and in fewer number every year. Some species, we've heard, could be gone in as little as four years.

The local tribal people lived with and beside the salmon for many millennia. They all flourished. It is time for people to accept immediate change to save all of our relatives. We must find ways to lessen our impact and to restore lost habitats. We must do this not just for the fish but those that rely on eating the fish as a food source. Human and Blackish alike."

Join Us for a Moment of Meditation for Southern Resident Orcas, August 8, 6 PM PST

Puyallup Water Warriors & Redefine Tacoma

AUG 8, 2018 —
Orca Network & the Langley Whale Center asks everyone to take a few moments to stop and meditate, pray, sing, or whatever you are moved to do, at 6 pm Pacific Standard Time (PST) on Wednesday, August 8th, joining our hearts to send love and strength to the Southern Resident Orcas. If you are near the water, go to the water's edge, and if so moved make an offering such as a cedar sprig or flower.

Click on the Facebook Event Page to Join: https://bit.ly/2nm8yU4

The endangered Southern Resident orcas are at their lowest population in decades, and the past weeks have been heartbreaking. The world has watched as J35, Tahlequah, holds on to her newborn, deceased calf for over 10 days; and as J50, Scarlet, struggles with her health. Those of us in the Pacific Northwest who know and love these orcas like family have been feeling the grief.

We are doing this as part of our annual Penn Cove orca capture anniversary commemoration on Whidbey Island. As we grieve for the orcas captured and killed in the captures, we also grieve for the orcas today who need more salmon to survive. We

hope that by joining together to meditate, knowing there are many of us around the world who care, we will find strength to carry on and do whatever we can to save this precious Orca community.

Acting decisively together NOW is our only chance to save our Southern Resident Orcas and restore the Salish Sea. YEHOW!

Puyallup Tribe Hosts 2018 Canoe Journey - Honoring Our Medicine

Puyallup Water Warriors & Redefine Tacoma

AUG 10, 2018 —
Last week Canoe Families paddled from all over the west coast to share in ceremony and protocol. This year the Canoe Journey was hosted by the Puyallup Tribe of Indians. Canoe families brought their medicines to share and bring healing to the waters of the Salish Sea. We pray that we all continue to bring our medicines to restore the Salish Sea and protect her from threatening fossil fuel projects.

Native Daily Network reports: Warm Welcome for Canoe Families July 30, 2018
Honoring our Medicine. That is the theme for this year's Canoe Journey which is currently in its final stages. The main event for many is the evocative experience of watching the multitude of beautifully created and sometimes colorful canoes come into land on the host's territory. The landing was held on the 28th of July in Tacoma,

Washington. In attendance to welcome the canoe families onto shore were the Puyallup tribal council and Connie McCloud the director of the tribe's culture program. Chester Earl, Chairman of the Puyallup Tribal Canoe Committee, was the MC. For a whole week after the landing, each canoe family will present themselves to the hosting tribe, one at a time, in what is known as Protocol. They will share stories, song and teachings as well as exchanging gifts with their hosts. The event will conclude on the 4th August with a closing ceremony.

Court Quashes Trudeau's Approval of Trans Mountain Pipeline

The Federal Court of Appeal has quashed the federal government’s approval of the troubled Trans Mountain expansion project, after concluding that Prime Minister Justin Trudeau’s cabinet made its decision without considering all evidence and failing in its legal duty to consult First Nations.

The decision, announced Aug. 30, is the first major court defeat for the project, requiring the government to ask the federal energy regulator or its successor to redo a federal environmental evaluation and correct a “critical” mistake it made to ignore the consequences of increased oil tanker traffic off the coast of British Columbia.

"Canada was obliged to do more than passively hear and receive the real concerns of the Indigenous applicants," wrote Justice Eleanor Dawson in a unanimous ruling that quashed the Trudeau government's approval of the Trans Mountain expansion project. The unanimous decision by a three member panel that heard the case will also require the Trudeau government to restart its consultations with First Nations about the project, before construction can proceed.

The ruling confirms longstanding criticism from affected First Nations that the Trudeau government took a "paternalistic," "unrealistic," and "inadequate" approach to consulting them, failing in its legal duty under the Constitution. The Tsleil-Waututh Nation, which occupies unceded territories in what is now known as the Burrard Inlet in the Vancouver region, and other affected First Nations launched the case almost immediately after the Trudeau government approved the project in November 2016.

Conservationists have also warned that the project threatens the survival of a few dozen southern resident killer whales that were already at risk, a concern that was acknowledged by the National Energy Board (NEB), following public hearings to review the pipeline expansion.

PSE is in violation of the Medicine Creek Treaty of 1854 and must engage in proper consultation with the Puyallup Tribe of Indians, the Original People of this land and of the Tacoma Tide Flats. PSE has been constructing their project even though they do not have an essential operating permit from the Puget Sound Clean Air Agency (PSCAA). Public outcry from Indigenous leaders, tribes, environmental groups, and allies on the lack of consultation and environmental review on the project has had an

effect. Last December, PSCAA required PSE to prepare a Supplemental Environmental Impact Statement to address the project's impacts on cumulative greenhouse gases.

On October 8th, a draft version of this SEIS was released for public review and commenting, before PSCAA releases their final environmental impact statement and makes a determination on the permit. PSCAA has set a hearing that is fast approaching on October 30th.

Our actions these next few weeks are critical to stop PSE's fracked gas project from receiving their PSCAA operational permit. PSE built without permits and we are determined it will never be operational.

Please attend the Public Hearing on October 30th! This is critical for showing our strength and solidarity and shutting this dangerous project down. Please join & follow the Sierra Club link to the Public

No Clean Air Permit for PSE's Fracked Gas LNG!

Puyallup Water Warriors & Redefine Tacoma

NOV 15, 2018 —
PSE's proposed fracked gas LNG project in Tacoma would increase our greenhouse gas emissions and further fuel climate change - which means more extreme climate events and wildfires. Our fire seasons have already intensified, causing death, destruction of homes, forests, and wildlife habitat. The increased air pollution makes us sick and leads to higher rates of asthma attacks, heart problems and cancer in our communities.

We have until November 21st to send in our comments and stop this disastrous project. **Click Here for a pre-written Comment Letter to the Puget Sound Clean Air Agency (PSCAA).** You can tailor the letter with your own words if you like. Puyallup Water Warriors & Redefine Tacoma

Recipient: Bob Ferguson

Letter:

Greetings,

TO: Governor Jay Inslee, Washington State Office of the Attorney General, US Army Corps of Engineers (USACE), US Environmental Protection Agency (EPA), Region 10, Washington Department of Ecology (WDOE), Puget Sound Clean Air Agency (PSCAA)

We stand with the Puyallup Tribe of Indians in their request for your IMMEDIATE ACTION to stop all construction on the proposed Puget Sound Energy (PSE) Tacoma LNG project.

PSE's proposed 8 million gallon LNG facility would lock citizens into 50 years of burning fracked gas and accelerated global warming. Once billed as a "bridge fuel", natural gas is now recognized as a powerful contributor to climate change. Organizations ranging from the Sierra Club to the NAACP have publicly opposed LNG as an energy source for the future. PSE's proposed LNG facility creates an immediate and unreasonable danger to thousands of Pierce County residents within three (3) miles of the massive storage tank. The LNG facility would require a steady supply of fracked gas from offsite wells that are built in communities that are not even identified as part of the project. Washington residents will be exposed to toxins and carcinogens used in the fracking, transporting, and cryogenic processes. As the world rallies behind the Paris Climate Change Accord that the current President has rejected, Tacoma faces the threat of becoming the fossil fuel dumping ground for the West Coast. The people of Tacoma, Fife, the Puyallup Tribe and Pierce County do not wish to be the common denominator for fossil fuels, volatile gas storage, carcinogens and more pollution. Our families and our children deserve better.

United against this unprecedented threat, we Petition our government for help against the grave environmental and social dangers that the proposed PSE LNG project presents.

On a legal front, we ask that the State Attorney General review the SEPA environmental review process for the project, the many requests for a

supplemental EIS that have been made, and the lawsuits that have been filed and will be filed for the failings that have thus far occurred, including:

1. Illicit Lead Agency Transfer. At the request of PSE, WDOE transferred lead agency review status to the City of Tacoma, despite the fact that the City lacked the resources to serve as lead agency and despite the obvious conflict of interest. The City stands to make millions of dollars per year -see EIS- from the siting and operations of this facility in the Port of Tacoma. WDOE also did not obtain lead agency transfer approval from the Puyallup Tribe of Indians, a Sovereign Nation, in breach of the existing Treaty.

2. Insufficient EIS. Despite the conflict of interest and the underwhelming resources, the City of Tacoma accepted the appointment and conducted an inadequate EIS that did not meet the legal standards for environmental protection, human safety, or consideration of alternatives. The City's response? That it did not need to consider such things as greenhouse gas emissions, or alternatives sitings, or any other alternatives (such as a 2.5 million-gallon tank instead of an 8 million gallon one) than what was being proposed by PSE because PSE would simply not move forward with the project. As for safety, the City chose not to evaluate a "material breach" of the facility and the grave danger that it would pose to the surrounding community. Such an omission represents a grave failure. The LNG facility is being built on unstable fill, just above water level, on a geologic fault, in the lahar zone of Mount Rainier. Tsunamis and sea level rise were not evaluated, yet they are a real threat in our region. The consequences of an event could (and likely would) result in death and injury to thousands of people.

3. Environmental Toxins and Greenhouse Gases. The project is sited on and near multiple Superfund sites, putting the community and Salish Sea at risk of exposure to deadly toxins. Communities where future fracking wells are placed will be exposed to carcinogens and toxins from the fracking well chemicals. Fracking wells are also linked to increased earthquake activity. The project will contribute to very large emissions of greenhouse gases from fracking well leaks that have been proven to be much greater than expected. These huge leaks make fracking gas much worse than other fossil fuels and will accelerate climate change.

4. Illegal Commercial Subsidy. LNG prices have fallen from $15 per 1,000 cubic feet to $5 since the project was proposed. PSE can still make a profit on this disastrous project because the Washington State Utilities and Transportation Commission (UTC) is allowing them to pass 43% of the estimated capital costs ($133 million of $310 million) on to PSE ratepayers,

yet the ratepayers are slated to receive only 7% of the usage. PSE will make a profit on a project that is not financially feasible and the public will be saddled with an environmental disaster. The ratepayers will not benefit from this alleged “peak shaving” facility for at least 25 years if ever, since PSE already has abundant capacity for natural gas storage at its Jackson Prairie site in Lewis County. Of course, if the LNG facility were to be built, it would create a need for more natural gas from off-site fracking wells, creating an artificial demand. Asking ratepayers to pay more for their natural gas because PSE is engaging in a commercial enterprise for profit is not fair to the ratepayers. And, allowing PSE to profit off the ratepayers by being permitted to consistently and continuously sell 93%-100% of the available LNG on an unregulated market without a credit back to the ratepayers for the gas they subsidized is not only inequitable, but downright illegal.

We stand on the edge of global environmental catastrophe. Massive climate change disasters are destroying cities and communities across the globe. Three hurricanes have blasted the Caribbean, and two earthquakes caused major damage to Mexico City. We are all stunned at the intensity, frequency, and devastation of these disasters. Historic forest fires have burned hundreds of thousands of acres all over the west, the Pacific Northwest, and Canada. During this time, Tacoma had the worst air quality on the planet. Our Salish Sea is suffering from decades of poisons and our keystone salmon and Orca families are pushed to the brink of extinction. This past week another Orca died of starvation, bringing the count of the southern resident Orcas in the Pacific Northwest down to 76. Fisheries biologists report that at the current rate of decline, within four years, there will be no salmon passing through Commencement Bay.

The Indigenous Tribes and Nations have been following centuries old teachings for the ways to respect and nourish this land. They have been stewards for thousands of years and are inviting us to listen and heed their words for the best ways forward in caring for all life here. We must learn to protect and heal our planet and we must do it now. We cannot allow toxic, dangerous fossil fuel projects like the proposed Tacoma LNG facility to be rammed through in violation of Indigenous sovereignty, treaty rights, wisdom, and in violation of our environmental laws.

The Puyallup Tribe of Indians has appealed the federal and state permits for the proposed PSE Tacoma LNG facility and on August 30, 2017, the Tribe wrote letters to you and your agencies requesting you take immediate Enforcement Action. We stand with the Puyallup Tribe in their urgent

request to you. We need your intervention to protect our health and safety, our environment, and the Salish Sea from this dangerous project. We ask that you and your agencies take the following actions:

1. Immediately issue a Stop Work order for all construction work on the PSE LNG facility and pipelines, in-water, in shoreline, and landward.

2. Revoke and then re-evaluate the Clean Water Act (CWA) permit, the WDOE Coastal Zone Management (CZM) concurrence, and the City of Tacoma Shoreline approval.

3. Deny issuance of a PSCAA NOC, pending re-evaluation of the above permits.

4. Conduct a legal review of the SEPA process for conflict of interest, failure to consult, failure to adequately identify potential impacts of the project, and failure to address all components of the project. Require the environmental review process be redone with a new lead agency that is free of conflict of interest.

The Puyallup Tribe letter of August 30 details multiple permit violations and massive deficiencies in the project permitting process. The immediate violation is simple: PSE has been conducting in-water work for the proposed Tacoma LNG project without meeting the Conditions required for the CWA permit and CZM. Obtaining Notice of Construction (NOC) permits from Puget Sound Clean Air Agency (PSCAA) is a required condition for these two permits. This is a direct violation of the CWA permit and the CZM concurrence and renders the permits invalid.

The review process for the project is marked by conflict of interests, failure to consult with the Puyallup Tribe, failure to seek meaningful public input, and huge failures to quantify the impacts of the project. In addition, the project has changed significantly since the EIS was written. Despite dozens of different requests for a Supplemental EIS, the City failed to act while at the same time PSE accelerates its construction to try and build before being stopped.

We need to retire fossil fuel projects, not build new ones. We need to replace them with sustainable alternative energy projects. Under great public pressure from Indigenous nations and local communities, investors have abandoned the proposed Coos Bay LNG project and the BC LNG project. The proposed Kalama methanol refinery was just denied approvals based on the failure of the EIS to address greenhouse gases. These were bad projects,

destructive to the environment and the future of the planet. The proposed Tacoma LNG project is even worse as it is unreasonably dangerous to the surrounding community. We cannot allow it to be built.

“Yehow” is a Coastal Salish word translated to English meaning “that which can only be done together”. We can recover our environment and our Salish Sea only if we do it together.

We need your help as leaders and environmental stewards. We ask you to issue a Stop Work order on the PSE LNG facility, and revoke and re-evaluate all issued permits and approvals on behalf of the request of the Puyallup Tribe of Indians, the citizens of Tacoma, Pierce County, and the Pacific Northwest, and the animals and fish of the Salish Sea.

aislinn melchior	Tacoma, WA	2017-10-01	It is unconscionable to put such a large holding facility so close to heavily populated areas, next to vulnerable natural resources, and along the main coastal corridor.
Diane Brandon	Waianae, HI	2017-10-01	I am an environmental warrior.
Yvonne McCarty	Tacoma, WA	2017-10-01	This dangerous refinery should never have been sited so close to residential neighborhoods. There are families that live only a half mile away from this plant. Not only will there be 24x7 toxic air emissions, the surrounding communities will live under the constant threat of a catastrophic incident (that was never even studied in the FEIS). It is absolutely immoral to let this project move forward.
Ann Bickel	Tacoma, WA	2017-10-01	Please stop this toxic project.
Kristina Brown	Tacoma, WA	2017-10-01	I believe we should be looking to the future and to do that we must protect our current environment. The LNG plant should not be located in a port that is surrounded by homes and it is not a sustainable fuel source.
Tara Reynon	Puyallup, WA	2017-10-01	I am a Puyallup tribal member ans advocate for children. We need clean water and our salmon for future generations. It's time to honor tribal and state consultations.

Laurie Olson	Port Orchard, WA	2017-10-01	I don't want the aroma of Tacoma to be even worse than it was in the past. We have yet to have the old superfund sites cleaned out and now they want to do this? We need clean energy and healthy choices for our communities and this is neither. Please don't let them build this here or anywhere else in WA.

Anita Beninger	Tacoma, WA	2017-10-01	Clean air should not be a privilege. I drive past the port almost every day -- the smell (taste) of the petrol takes my breath away. Bad air effects the health and wellness of the people who live and work in the area. I want clean air.
Kathy McFall-Butler	Federal Way, WA	2017-10-01	This liquified natural gas plant is being built on already polluted soil, in an earthquake, tsunami, and lahar zone, six blocks from neighborhoods and near many schools, hospitals, other industries (workplaces) and several cities. In case of failure, there will be no viable evacuation options. Hundreds of thousands of your constituents and their properties will be in harm's way.In 2004, a much smaller facility in Plymouth, WA exploded. About 1,000 people were successfully evacuated. There aren't many people in Plymouth. There are in Tacoma, Fife, Milton and Federal Way.A foreign LLC will not take responsibility for damages, leaving WA State on the hook financially.With climate change already having devastating effects, we need to scrap fossil fuel technologies, and move into the future with renewable, green (not green-washed) energy sources. Oh - and it's being built without permission on Tribal land.
Kathy Lawhon	Tacoma, WA	2017-10-01	The Orcas are dy9ing and methane is devastating the environment. And I"m sick and tired of seeing the Puyallup so disrespected.
Lauren Waltzing	Snohomish, WA	2017-10-01	We need to invest in clean energy and not further pollute our state.
Madalyn Harvey	Tacoma, WA	2017-10-01	I am signing because as a homegrown Washingtonian, if I didnt step up against climate change id be going against the very thing our wonderful state is known for, being beautiful, green, and clean. It definitely isn't sustainable. Why not instead of milking the earth for the rest of its (tiniest) reserves we start investing in renewables... Barbara Lewy	Seattle, WA	2017-10-02	Totally aside from the rights of our native community, this is the wrong direction to be going in stopping global warming.
Boyd Holm	Tacoma, WA	2017-10-03	All items listed on this petition. LNG does not have a place on tideflats of Tacoma and so close to residential areas.
Kristy Royce	Seattle, WA	2017-10-03	Because I have children and I want them to have a planet to call home. We are currently at 410 ppm and 350 ppm of carbon in the atmosphere is considered safe. We NEED to put our children and their future above PROFIT. We need to switch to alternative energy. My home and car run on solar. We can do this, we just need the political will. Washington needs to lead by example.
Carol Ann Roan-Dennis	Freeland, WA	2017-10-03	Leave our environment whole and green. Go away. Scat! Shoo!
Andrea Taylor	Seattle, WA	2017-10-03	I grew up in Puyallup. I remember all too well when Commencement Bay was a superfund site and Asarco spewed arsenic across the Puget Sound. Never again! Protect our waters, protect our citizens, transition to clean power now!
Robert McConnell	Gig Harbor, WA	2017-10-03	THE INDIANS ARE RIGHT
Barbara Phinney	Seattle, WA	2017-10-03	No LNG, keep people in WA safe and protect the Salish Sea (what you call Puget Sound). Green is the future, fossil fuels are the past. Think of the children!
Josie Moberg	Portland, OR	2017-10-03	The Tacoma LNG project should not even be a discussion. We need to be moving in the exact opposite direction of projects like this one.
Kim Pipkin	Seattle, WA	2017-10-03	No Fracking in WASHINGTON!
Joe Thorne	Duncan, Canada	2017-10-03	I support Puallup Nation an water protectors against LNG
Heather Hope	Tacoma, WA	2017-10-03	Fossil fuels are our past. We must look to our future and the future of our children. A cleaner world powered by renewable resources with less climate impact.
Deejah Sherman-Peterson	Seattle, WA	2017-10-03	How can our "green" governor support this project? Fracked liquified "natural" gas is terrible for Earth's creatures!

Foreign(Australian) owned energy company PSE pressuring Local citizens into a costly and dangerous future by fracking our land and running an underground gas line beneath the water and through the Port of Tacoma in close proximity of a quake fault line. Jacky Smith	Coalway, England, UK	2017-10-03	Fracking is a world-wide issue and needs dealing with everywhere. Frack off!
Monica Greenberg	Seattle, WA	2017-10-03	Just no. The Pacific Northwest should be leading the nation in renewable energy, not going down this ugly path again.
DIANA ARMSTRONG	Tacoma, WA	2017-10-03	I'm signing this because I don't believe that creating a few temporary job's for some is worth possible loss of lives of so many people, animals and nature. Stay out of and away from our homes. We need to ensure a bigger and better future for our children. LNG Fracking does not ensure this.
M. Kai sanburn	Lopez, WA	2017-10-03	LNG is dirty. It's no time to put good money into polluting and damaging fossil fuel projects.
Seth Hill	Kent, WA	2017-10-03	No LNG
Barbara Bengtsson	Seattle, WA	2017-10-03	We need a just transition away from fossil fuels not new fossil fuel projects. Puget Sound Energy, the company pushing this LNG on Tacoma is owned by an Australian investment bank. Their decisions are driven by short term profit goals not concern for people's safety, the environment, and the future of humanity.

Robert Worley	Bellingham, WA	2017-10-03	The facility would be a terrorist target. Not safe for neighboring citizens.
Brenton Friedli	Covington, WA	2017-10-03	Fracking has been shown to increase risk of earthquakes & like in LA area dangerous if it leaks. Our state is about progressing into the future, there is no future in fracking.
Merlla McLaughlin	Woodinville, WA	2017-10-03	This priority of short term gain over long term survival has to end now. This planet is like a closed-system spaceship. You don't toxify your life support systems on a spaceship. It's crazy, truly crazy.
David Wright	Seattle, WA	2017-10-03	I am signing because fracking breaks our bedrock, making gases and contaminants to come to the surface sometimes miles from the injection site and we are causing earthquakes with it. Keep the petroleum in the ground. NOW.Besides, the Tacoma Dome covered with solar panels could probably power most of downtown Tacoma. We don't need no stinkin' LNG plant here.
Brianna loucks	Spanaway, WA	2017-10-03	Not only is it detremtal to the whole environment and ecosystem, it also threatens our family's and lives.

Nancy Coole	OLIVEBRIDGE, NY	2017-10-03	NO FRANKING ANYWHERE
Ann Sloper	Seattle`, WA	2017-10-03	Tacoma is my home town. This reflects my position"PSE's proposed 8 million gallon LNG facility would lock citizens into 50 years of burning fracked gas and accelerated global warming. Once billed as a "bridge fuel", natural gas is now recognized as a powerful contributor to climate change. Organizations ranging from the Sierra Club to the NAACP have publicly opposed natural gas as an energy source for the future. PSE's proposed LNG facility creates an immediate and unreasonable danger to thousands of Pierce County residents within three (3) miles of the massive storage tank. The LNG facility would require a steady supply of fracked gas from offsite wells that are built in communities that are not even identified as part of the project. Washington residents will be exposed to toxins and carcinogens used in the fracking, transporting, and cryogenic processes. "
Deborah Parker	Bellingham, WA	2017-10-03	The WORST idea ever, poisoning our sacred water to create earthquakes and poison our skies! NO, NO, NEVER! BAN FRACKING NOW!

Patricia Freiberg	Vancouver, WA	2017-10-04	LNG is for long living gas, methane which takes much longer (I heard 25 times) to break down than CO2. Puyallup Tribes don't want the pollution, neither does Tacoma or Kalama. Using long-living gas adds to the greenhouse mixture in the air and the breakdown of our oceans.

Annemarie Senol	Tacoma, WA	2017-10-04	Turning rock to sand in order to extract natural gas imperils water and causes earthquakes while also polluting surface water. Fracking is fracturing rock into sand. You building a house on rock but fracking companies can reach in an pulverize that rock. We liquify that gas and bring it here where it endangers our waters and could become catastrophic during a natural disaster, earthquake, volcanic eruption, tsunami. It's not a risk we should take or support. Stop construction on the proposed Puget Sound Energy Tacoma LNG project.

Cathy Spalding	Olympia, WA	2017-10-06	PSE is an AUSTRALIAN company! Their customers already pay MUCH higher prices than from local PUD's. Can they frack in Australia? No, this is about making more money and paying their shareholders while destroying the earth and environment in another country - more specifically - OUR community. Fracking is a dangerous process that produces highly toxic water waste AND creates earthquakes. Neither of those byproducts is healthy for this state. And more earthquakes... really?? Look at where we live! While it is clear that the US EPA will not care about this, ALL of you know the serious consequences proven to be the result of fracking. It will be a boon for an Australian company and a horrific disaster for our community. This is outrageous.

Eddie Griffiths	Seattle, WA	2017-10-07	Active construction of PSE's LNG terminal in the Port of Tacoma is in gross violation of the rights of the Puyallap Tribe and the taxpayers of Tacoma, neither of whom have been consulted. It is intolerable that this travesty is proceeding apace ABSENT REQUISITE PERMITS FROM EPA, WDOE AND PSCAA. This proposed LNG terminal will guarantee grave adverse risks of toxicity and explosion potential to the entirety of the metropolitan area as it is being built upon seismically unstable land. It is imperative to the welfare of the tribe, the citizenry and our Salish Sea that this abomination NEVER come to pass.

Jacquie Stout	Kansas City, MO	2017-10-07	Records from disparate corners of the United States show that wells drilled to bury this waste deep beneath the ground have repeatedly leaked, sending dangerous chemicals and waste gurgling to the surface or, on occasion, seeping into shallow aquifers that store a significant portion of the nation's drinking water.In 2010, contaminants from such a well bubbled up in a west Los Angeles dog park. Within the past three years, similar fountains of oil and gas drilling waste have appeared in Oklahoma and Louisiana. In South Florida, 20 of the nation's most stringently regulated disposal wells failed in the early 1990s, releasing partly treated sewage into aquifers that may one day be needed to supply Miami's drinking water.

The petition lists the facts, so I won't repeat them, but I would like to add that as a city of innovation and a reputation for a healthy lifestyle with a minimal carbon footprint, allowing such a project is very disappointing. Before, climate change could possibly be written off as not true as we could not see the effects. We can see the effects now with severe weather patterns that will only get worse. How can we possibly call ourselves good parents when we leave our children and/or grandchildren a world where we see massive environmental destruction, terrible air quality and poluted water. A good parent would not be doing things that will likely reduce the lifespan of their children and expose them to so much risk. LaDonna Robertson	Tacoma, WA	2017-10-11	Do we want to have the PSE LNG facility lock Tacoma citizens into 50 years of burning fracked gas and speed up climate change while exposing people to carcinogens and explosion dangers? NO! It is another Millionaire Factory that will cost $310,000,000 of which ratepayers will pay $133,300,000 and dealing with 87,000,000 gallons of fracked gas per year for only 18 permanent jobs. Sydney, Australia's Macquarie Investment Group will profit -- not WA state. Remember: LNG is NOT a gateway to renewable energy; it is not LOCAL, SAFE, or CLEAN. loretta garrett	tacoma, WA	2017-10-13	I spoke with my sister in Oklahoma and they are fracking up north and now Oklahoma has had over 70 earthquakes. Not only do they have contamination from the fracking they are creating problems with the different underground plates and the state of Oklahoma is paying for it dearly. Of course the head of the EPA that wants to destroy it used to be the Attorney General of Oklahoma and he was always with the fossil-fuel guys against the EPA. So I guess if you want destroyed the EPA you put an infection at the top and it will spread down through the ranks. Everybody please remember fracking does way more then just add dirty water to the sound it produces deadly chemicals and remember we sit right on one of the biggest faults. Can these money hungry guys guarantee they aren't going to set off any volcanic activity in our area!

Even if a minute possibility of destroying the area exists I am against it, and the exploration and utilization of natural gas could bring catastrophic consequences to the sea life, human life and tourism in the area. I certainly would not want to enjoy the prestine waters of the area if they were polluted. I sat at the Edgewater Hotel and while having lunch I could see the jellyfish in the water. Edwin R. Seils	Rochester, NY	2017-10-20	Although not a resident of Washington state, (I'm from New York State, where fracking has been TERMINATED by a Change petition), and I totally agree with Dakota. Fracking has been proven to cause earthquakes, mudslides and numerous other "natural" disasters by disturbing the natural underground system (where natural gas is found). Furthermore, the discharge from fracking causes tremendous damage to the ecosystem by discharging chemical waste, thereby killing ALL LIVING THINGS in the area.If Washington state is going to approve this dangerous bill, I suggest the discharge waste be dumped in Governor Jay Inslee's back yard. Maybe he can enjoy it with his family!

Myrddin Emrys	Beaumont, TX	2017-10-20	America should not be going back on it's word for any reason.. reclaiming lands not owned or controlled by the US. They do not want this on their land, and, considering the implications of harm from fracking, this should be a no-brainer. Stop it from happening.
Lea Theriault	Thetis Island, Canada	2017-10-20	New Brunswick, Canada has been successful at stopping fracking.
SCOTT STARK	CLEARWATER, FL	2017-10-20	I am totally against any type of fracking. I grew up in Wichita Ks. Never in my life have we had an earthquake in Kansas. Now they are common place with the fracking going on in Oklahoma.
Angela Wanak	Salem, OR	2017-10-20	I'm signing because I care about our Mother Earth and the health of future generations.
Anne Rogers	New Paltz, NY	2017-10-20	There is just no reason for fracking! We are smart enough to know it now we need to stop being selfish and greedy with our energy. Everyone needs to conserve and show the big profiteer we do not need it!
Donald Mahardy	Florence, OR	2017-10-20	What about. Cascadia. Another big LPG co failed to get permits to build at Coos BAY TO EXPORT THE GAS. ENOUGH !
floyd baker	Brackendale, Canada	2017-10-20	Fracking should be outlawed everywhere !!!
Carol Hall	Seattle, WA	2017-10-20	Water is Life🌎
Lance Edwards	Louisville, KY	2017-10-20	Let's give this sort of fossil fuel nonsense a permanent timeout. This is a country of over 300M. Why do they interests of only 1% of that population seem to count, and in spite of the science?
Amy Ragsdale	Missoula, MT	2017-10-20	Surely it's time to start investing in non-toxic, non-earth destroying, green energy! Do no support investment in potentially destructive, dying technologies. Plan for a healthy future! Oppose this natural gas plant.

Linda Withrow	Morgan Hill, CA	2017-10-20	I'm Signing this petition because it is the right thing to do... The USA has done wrong by the indigenous people for so many years ... let them live on their land in a safe livable environment .. We must do that!!
Marilyn Howell	Fort Collins, CO	2017-10-20	We don't need more fracking. Why do these fracking companies always go for native Americans land? I say to company CEOs go track your own land. Frack behind your manisons, poison your children.
Anna Binczarowska	Poznań, Poland	2017-10-20	I'm signing this petition because the cause is of great importance not only to the people of Washington State, not only to the natural environment in the area - it is important on the global scale.
AnDrew Sproul	Orinda, CA	2017-10-20	Mother Earth is sacred. We abuse her at our own peril. She will survive even if (especially if?) we don't.
Russell Hoyt	Quincy, WA	2017-10-20	I think tribal land and nature reserves should be untouched for all time. There are people who literally have minds like robots i do not even think there cold unemotional minds even consider long term profit.
Richard Chalfan	Bellevue, WA	2017-10-20	The cost to our environment is too high to allow fracking in this state.
Daniel Frye	Knoxville, TN	2017-10-20	Enough with all the pipelines on indigenous people's lands. They've lost too much already. Find somewhere else to build your potentially hazardous fracking facility!
Bob Railey	Marquette, MI	2017-10-20	The entire world needs to walk away from all "high risk" fossil fuel projects now that the world (unfortunately not including the Trump administration) recognizes the catastrophic future of not reducing our carbon footprint. The first step in reducing the carbon footprint is to not allow any new "high risk" projects such as fracking, near-shore drilling, and long-distance pipelines.
McKenzie Duke	Detroit, MI	2017-10-20	We need to protect our planet, our water, and all earth's diverse species from the degradation of dirty oil and gas and their polluting effects!!

Jenny Walicek	San Jose, CA	2017-10-20	Governor Inslee, here is more than enough reason to halt this fracking project: "Dakota and the Puyallup tribe call themselves the “salmon people” – if the salmon disappear, they say they will too. But this LNG facility puts all of us in danger. It would create an immediate and unreasonable danger to the thousands of people within three miles of the massive storage tank and would require a steady supply of fracked gas from offsite wells. Communities living near those wells would be exposed to toxins and carcinogens used in the fracking process."

Now all we ever hear about is the govt not honoring promises, like with social security. It seems like a bunch of really nasty people took over the govt when someone wasn't looking. But even if no land claim settlement was violated, I would still be against it. When people don't want the jobs that would be created, it must REALLY be bad. Then we're dumping all these problems on our children & grandchildren. But I'm surprised by this, because I really thought people had stopped breaking promises to Native Americans, sort of the way God once said He would never again flood the earth. For a people who agree that Andrew Jackson treated Native Americans despicably, this is surprising. I guess the country only admits the truth when it's convenient? What I really want to know is, how long do they think they can KEEP lying & lying, making promises about social security, etc, only to decide on a dif

There have been reports that some areas in the States have had more earth tremors than they have ever experienced. It appears that fracking is causing this to happen. It seems there is nowhere that is sacred anymore. My heart breaks for the Indigenous people - who are totally in tune to the harmful effects of big oil ruining their land and their survival. Robert Sheehy	kansas city, MO	2017-10-22	It's been proven by numerous engineers and scientists. Fossil fuels are no longer necessary. The only reason we are still harvesting and using them is because the oil companies have hundreds of politicians in their pockets. They spent 720 million dollars in 2016 alone on lobbying congress. If they are willing to blow that on lobbying ask yourself how much are they making in one year.

trish Goodvin	Longbranch, WA	2017-10-26	Native rights for land and water and sky
Danon McMahan	Centralia, WA	2017-10-26	Treaty rights need to be honored. Fracking has been found to be worse than coal in contributing to green house gas climate change and is destroying the water, air and soil. Stealing land from many Americans for a fossil fuel that is not necessary at all, we must turn to real clean energy now or face worse natural disasters.

Susan Evans	Wenatchee, WA	2017-10-26	I support the Puyallup Tribe. Climate change is real. The plans to use LNG with ships is untested and lacks safety guidelines. This is located in downtown Tacoma and that is dangerous for the city. The project is proceeding without the correct permits.
rachel moore	Beaufort, NC	2017-10-26	I agree with the cause 100%
Joanne Jimenez	Berwyn, IL	2017-10-26	Its very important
Delaina Waite	Princeton, TX	2017-10-26	Please listen to the Native Americans. They have lived off the land for centuries. Listen, through the centuries, they brought their children up and taught them to respect and love the land. So much of our beautiful earth could remain that way. . . beautiful, if we would just respect what we were given. People have survived for millions of years without some of these so called luxuries. Do I drive a car? yes... do I use electricity? yes... and I use and yes, even enjoy other luxuries. It makes me just as guilty as the next person who does the same things. Please. . . don't destroy what little we have left.
India coleman	Abington, MA	2017-10-26	I care, about our environment and we need to keep some things sacred. I am sick and tired of these big money corporations destroying our land because they are greedy for more. It's time for all of us to stand up against them!

Andrine Olson	Vashon, WA	2017-10-27	Indigenous peoples' land is their own. No one has the right to force a pipeline on a sovereign nation. Our indigenous people have a right to their traditional lands, and their traditional foods and their traditional cultural practices. And they have a right to live in a clean environment - like that of their home when we appropriated it from them.

Inga Thomson Hilton	Kamloops, Canada	2017-10-27	Fracking is very harmful in itself, and the transportation of LNG creates its own problems. Respect indigenous lands and peoples.

What will his legacy be?
MICHAEL SOTO	Sylmar, CA	2017-10-30	No fracking ANYWHERE!
Debbie Rowe	Auburn, WA	2017-10-30	Climate change is caused by CO2 and LNG is a major contributor of CO2. LNG is not safe for the people living around the port of Tacoma. The Oceans are very polluted. There are other alternatives to LNG. IE wind, water solar. The rest of the world is committing to alternative energies. We should protect our children and grandchildren.
Jacob Ruzicka	Spokane, WA	2017-10-30	I'm signing because Washnigton has enough wind, water, and land that fracking in an area where people live is dangerous. It is a scheme for a few to make a lot of money and risk the health and safety of the public now and 20 years from now.

Jeani Sandberg	San Antonio, TX	2017-10-30	I'd like to know just HOW TRUE the movie "Population Zero" is, where the tiny little girl catches on fire trying to get a glass of water, her mother dies of cancer, and her little brother has birth defects & dies. The main character that you see says it's about halfway between fiction and a documentary. My husband works at a small college, & I told him he should play it for students Friday evenings, after getting permission from the college. He said he can't because it's illegal (I think referring to the copyrights), but the movie is FREE on-line. If someone can get the producers, etc to give permission for people to show this movie on college campuses, I think it would really help. Perhaps they could email Palo Alto College, Sciences, inviting them to show the movie every Friday evening. It would also be helpful to have information regarding what parts of the movie are real, and how perhaps parts of different stories have been stitched together. Someone told me to let her know if I find someone

There are already residues from pesticides, herbicides and even nuclear radiation present in our water, soil and world. We are losing touch with nature on which we, along with all other life forms on Earth, depend. We must change our global mindset if we are to survive as a species. Nature has a limited capacity to rebound from humans' reckless actions. We have been witnessing unusual weather patterns throughout the world although some people are in denial that humans are at fault. Not only have humans suffered as a result, but living ecosystems have been adversely affected. People must be ready to make some personal sacrifices for the common good of all.

We must work toward cleaning up the messes that we have already made and not make more!
Richard Maclaurin	Victoria, Canada	2017-11-03	Fracking has immense repercussions on the extended environment throughout an area such as Puget Sound. It is a catastrophe, used as a cheap option , by The Mining Corporate industry, for quick , and massive profit, for themselves, and a small handful of dependent companies.The Puyallup Tribe are to be simply swept aside by this Corporate power base...we stand against that abuse, by an uncivilized and destructive , backward Industry, that seeks to damage , or destroy , this unique and precious habitat., and those families who have the right to maintain their lives dependent on the Puget Sound.
Laura O"Brien	Courtenay, Canada	2017-11-03	I'm signing because we need to move away from total dependence on fossil fuels and become diversified in our energy needs. I also think fracking is the worst as it destabilizes the very land we live on top of and pollutes the water table.

James Daschle	Regina, Canada	2017-11-03	I am not against gas development, but only if it is sustainable ecologically and our environment and that for the future generations it is thought out and doesn't just fill the pockets of the greedy today. This is a bad plan, designed only with economic theory put into it. The costs of a disaster, which will happen one day, cannot be discounted or repaired with just money. The losses in the environment from the imminent failure of this infrastructure that will happen can never and will never be repaired.
Garry Edwards	Quesnel, Canada	2017-11-03	Climate justice and social justice sometimes demand opposition to economic projects which are not in accord with anything but profit for a relative few. I have been to Puget Sound and sincerely hope it will be relatively pristine generations from now.

Jeanne Wilfort	Montréal, Canada	2017-11-03	Let us all stand up with the Puyallup Tribe to protect our planet, and insist that fossil fuels be kept in the ground. Fracking is a dangerous practice and should be BANNED to protect the health of our people and our planet. This means of extracting gas permanently pollutes water. We cannot support such a practice anywhere.

Rape of the earth is not an option and corporations must be forced to go the less easy route by developing sustainable energy sources. Fracking is far too dangerous a process, contaminating ground water, wasting untold gallons of good water and even possibly causing earthquakes.
Debbie Filip	Ingersoll, Canada	2017-11-04	I am signibg because our environnent that we live in is one of the most important things we absolutely must protect. If it fails, then so do we. We must stop companies from poisoning our land just because they see a market for it. If we need some kibd of fuel or product but must destroy where we live to get it, money and vrain power needs to be put into new innovations that are safer

The reality is that am expensive modification is required. This is why the touted deal with Totem fell through. The other reality is that no other LNG filling station exists, severely limiting the range of such ships.Then there are the ecological problems:. Natural gas supply, given the backlash aginst fracking,. A pipeline to deliver the natural gas.. Water usage. Waste disposal. Disaster planning.CUSTOMERS

Energy from fossil fuels is a short sighted process that leaves long standing destruction in its wake. If money is allowed to continue to rule the world we risk too much. Political people elected to positions of power have great responsibility. We know our planet is at turning point. We should act accordingly. With native american rights to be honored this LNG proposal should be denied. That would seem to be an easy conclusion were it not for the insidious workings of business dealings that benefit a select few. Our future is being written.

marlene burr	Port Angeles, WA	2017-11-08	Gas is in the future of our society. It is an amazing, plentiful resource that "in use" does little harm to the environment. It is important however that in the harvesting it we don't destroy where we live. "Fracking" for gas has to fundamentally change before it can be approved for use in Washington State, or the US in general. The disposal of chemicals known for both short and long term harm into groundwater in the name of "harvesting a resource" is appalling. The clean-up of the damage may never be possible, so avoiding damage now is of the utmost importance. I feel we can harvest this gas without using "fracking" methods and it must be researched and investigated. Btw I think it would be great if Washington State came to the fore in breakthrough research that allows easy affordable gas extraction. Please make sound gas extraction practices possible by working towards that instead. Please proceed with caution, and beware of the "funder effect" on research that says "fracking" is good.

Lari Belivanakis	Cincinnati, OH	2017-11-08	I think human beings are the dumbest creatures roaming the earth and we will cause our own extinction due to our filthy living practices and corporate greed. We understand the devestating consequences of fracking, but continue anyway. Wake up people! There will not be a "safe or clean" place left on earth for our children and grandchildren etc. Being unable to use water in your home because it's flammable is a direct effect of fracking. Only one example of the many issues caused by fracking. Just say NO to fracking and corporate and government destruction of our land, water, and air.
Rose Clark	Fox river grove, IL	2017-11-08	I stand with the Puyallup Tribe . This is their Constitutional Right. They and millions of people do not want children poisoned by all the toxins. How about building these horrendous gas chambers next to the homes of the corporate owners.

N.J. Rustemeyer	Vancouver, WA	2017-11-08	Renewable energy is the way of the future. No fracking!
Kathryn Howe	Minneapolis, MN	2017-11-08	It is egregious that our country does not honor the treaties - in letter or spirit - that we made with our native fellow citizens. Putting their water, land, air, and bodies in danger for the wealth of a small portion of some powerful people is unacceptable.
Laura Barringer	Columbus, OH	2017-11-08	Protecting our people, wildlife and planet should come before corporate profits. It's time to stop all fracking!
Jerry Ruscitto	Coatesville, PA	2017-11-08	Toxic pipeline leaks is Bad Hazardous Threat for Drinking Water Supply how do Clean Up did Trumps Idiots figure this Out Fuk No its all bout the Money Corporate zGreed
Christopher Carlin	Collingswood, NJ	2017-11-08	I'm signing because,enough is enough. The american people didn't vote this moron into office.Unjustly,he is still allowed to call himself the leader of the free world. So as long as he and his administration continue to try to enforce backwards policies,we have to be here to voice our opinions about what he is trying to do,and to rise up against this regime.
June Didier	Mount Vernon, WA	2017-11-08	I don’t believe in fracking for any reason it is short sighted and most dangerous
James Buzzard	Endicott, NY	2017-11-08	Honor it!
alisha leviten	shoreline, WA	2017-11-08	i can't believe that there is even consideration of a fracked gas facility in washington state. there shouldn't be fracking anywhere, but that said, do not allow this facility or any like it here in washington.
Dian Smith	Bemidji, MN	2017-11-08	Honor the earth. Protect the sacred. Think of our future generations. Invest in green energy that is much less invasive and much less destructive to the earth. Please.
Lawrence Emerson	National City, CA	2017-11-08	Need to move away from fossil fuel dependency. MultiNational companies profiting without concern for pollution and people’s health and environment.
Talia L	Tampa, FL	2017-11-08	I see you're putting a non native species into a pool of perfectly healthy fish and ecosystems etc. this is surely disrupting the whole environment. Is this even your land and water to do this? For sure you can find another environment for your gmo salmon etc. please think!!! This is how things become extinct etc. there's so many ways to avoid this so all are happy and so we all can thrive
Alda St. James	Makawao, HI	2017-11-08	Don't destroy any more land. We stand with the Puyallup people who know how to protect our land and environment.
Taryn Kelsch	Sandy, UT	2017-11-08	We deserve better.

Judith Bergson	Somerville, MA	2017-11-08	NO LNG facilities In or near Native Peoples' Lands.
Dennis Strand	San Diego, CA	2017-11-08	Duh..... save the planet for our children
Christine Yellowthunder	Fairchild, WI	2017-11-08	Mi live by a Frac Sand mine that is encroaching on my conservation woodlands I have been growing and protecting for 28 years on the homeland of my husband's people. This is where the fracking begins. Sand mines are depleting our aquifer and the blasting is fracturing wells and foundations. The governor here only encourages the destruction of the earth. Animals of all kinds are taking shelter in my woods. My heart is breaking. Every living thing is related.
leo steahly	Vero Beach, FL	2017-11-08	we need to tread gently on our planet mother earth.....

Kathleen Clark	Monrovia, CA	2017-11-08	I’m signing because the waterways need protection & agreements need to be honored.
Bruce Agte	Binghamton, NY	2017-11-08	The Old People of this land deserve a voice. The land was taken from them. Now an industry that produces environmental toxins wants to take the land from All People. No.
Dayna Carlson	Portland, OR	2017-11-08	This government is suppose to be of the people for the people, you need to start LISTENING to the people!
Lee Smith	California Hot Springs, CA	2017-11-08	Stop fracking. We need renewable energy. Protect the Puyallup Tribe.
Gayle Lashua	Bedford, TX	2017-11-08	Our next generation should have the same things we were able to have in life and with all this fraking and people wanting to put in these huge oil lines and killing our Ozone I’m scared they will have very little of our beautiful Earth to enjoy. ����
William Goslin	Barboursville, WV	2017-11-08	I'm signing because I believe the natives have a right to determine if they want this on their land or not.
kathleen buckley	Stoughton, MA	2017-11-08	Protect our national resources.
Karen Fiene	Albany, CA	2017-11-09	We need to speak out for our sacred lands and look for alternative sites that do not diminish our heritage.
Frank Smith	Shelton, WA	2017-11-09	The land is sacred.
Mark Gall	Pueblo, CO	2017-11-09	Fracking new areas is NOT a reasonable answer. These plants habe proven to never be clean. That is unreasonable.
Guadalupe Yanez	El Paso, TX	2017-11-09	We all need to find solutions to clean the environment and not to continue polluting it more than it already is. Mother Earth is hurting and we need to help keep it clean of hazardous contaminants.
Nathalie Bridegam	Amherst, MA	2017-11-09	I'm signing because the proposed 8 million gallon liquified fracked gas facility not only denies the Puyallup Tribe the fishing areas that have always been theirs and should always be their, but also because the extension of fracked gas facilities enormously harms the environment of the entire globe. We need to swiftly and energetically transition to sustainable fuels and immediately stop extending our dangerous dependence on gas and oil.Nathalie Bridegam
Sharon Mckotch	Jamestown, NY	2017-11-09	I would love to see our planet survive the onslaught of abuse Please save and preserve
Katherine Noble	Stillwater, MN	2017-11-09	We must keep the water, land, skies and all peoples safe from toxic fracking and gas. It's vital to the tribes but also to anyone who has seen the beauty of Washington state and the Puget Sound.

Lana Weller	Bellefonte, PA	2017-11-09	Stop this craziness!!! Every life matters in this world, including animals, fish etc. When is making BETTER CHOICES TO SAVE THIS EARTH MORE IMPORTANT THAN $$$ IN YOUR POCKET. And don't tell me it's to make things better for the people. You act as if we are ignorant and don't know what you are doing. I'm not a scientist, but do know when someone is trying to kill us with toxins and shorten our lifespan with chem trails and other hidden agendas. Make our country BETTER, NOT WORSE before we don't have a country to be proud of...before we don't have trees for shade...before we destroy all the natural beauties God gave us. Why can't we use some of the brilliant discoveries that will help our plant, even though it won't put $$$ in your pocket. People care, why don't you?????

Ethan Strahan	Port Angeles, WA	2017-11-09	Considering the environmental damage being done by fossil fuel extraction and use along with the fact that clean methods of powering our society exist, it's a moral imperative to work towards a full discontinued use of fossil fuels. To develop more infrastructure in the fossil fuel industry is insanity given the ecological and social degradation it has caused. I stand with the indigenous people and anybody else who recognizes that this project poses an ecological and social health threat, and it must be thwarted.

Elizabeth Riebschlaeger	Victoria, TX	2017-11-09	These plans just demonstrate the heinous attitude of the oil and gas industry as it shamelessly flaunts it's power over our democracy. They are destroying our democracy after portraying themselves to be the "savior" of the USA by providing us with "energy security and independence". That was not true. Real energy security comes with natural, sustainable energy. Natural gas emissions, most of which are methane, are destroying our planet and accelerating Global Warming and destruction. This LNG plant, pretending to be the source of an economic boom, is a "wolf in sheep's clothing" that will devour the community so it can exploit their coastline and make millions for the few corporate billionaires. They do not care about, respect or honor the tribal citizens and their way if life. This industry does not care about the will if the people. This industry only cares about using it's corrupt power over legislatures and the Congress to force its will on citizens and tread over their rights and our democracy. In

Bill Connor Connor	Cupertino, CA	2017-11-09	The Puyallup tribe and others living near this proposed plant should not be put at risk by this operation. Fracking is environmental suicide no matter where it's done! To break down the barrier between oil and gas bearing substrate and our water supply is a geological event that will not be undone in centuries. You can't get much more stupid and greedy than that. Then we add dangerous chemicals that they don't even have to tell us about to the mix. Did I mention earthquakes? STUPID DOESN'T COVER IT!

Madeleine Fisher Kern	Los Angeles, CA	2017-11-10	Dakota Case is a young father, a grandson and a fisherman in the Puyallup Tribe of Washington State. His family and many of our families have been living off the salmon in the Puget Sound for centuries, but our home – and our planet – is now at risk because of a proposed 8 million gallon liquefied fracked gas (LNG) facility.Sign this petition to protect their home and demand that Governor Inslee take action to stop this harmful project.Dakota and the Puyallup tribe call themselves the “salmon people” – if the salmon disappear, they say they will too. But this LNG facility puts all of us in danger. It would create an immediate and unreasonable danger to the thousands of people within three miles of the massive storage tank and would require a steady supply of fracked gas from offsite wells. Communities living near those wells would be exposed to toxins and carcinogens used in the fracking process.What’s more, this facility

We have created a policy to help the issue of unsafe drinking water in New Jersey. Please support our policy by signing our petition to help protect everyone in the state of New Jersey from dangerous chemicals in their water. Our policy is (YPSWI) The Yearly Public School Water Inspection. This policy insures that all public schools will have clean water, and a water test would be conducted annually. Some disadvantages are that it would cost a lot of money, and this policy is only regulated for public schools and tax-supported charter schools in the state in New Jersey. The advantages are that it would protect students from harmful chemicals at schools, no matter what the town's financial stance is. The level of government responsible for carrying out this law is State government. State government is responsible because it is supporting all of the tax-funded schools in New Jersey. We would ask Senator K

Robert Khanlian	Corrales, NM	2017-11-14	It's (past) time to move away from carbon fuel, keep our planet clean and green, and honor the treaties giving indigenous people control over their land, water and air.
Stephen Stainback	Knightdale, NC	2017-11-14	This entire land belongs to God's people. (NATIVE AMERICANS). The white man needs to stop his aggression towards these people and respect them and their land. The live of money over people must end.
Lynne Sloan	San Francisco, CA	2017-11-14	I grew up in this region and fracking has no place there.
Marianne Masteller	San Juan Bautista, CA	2017-11-14	Did you see what happened after Harvey hit the chemical plants , and the refineries ? How could you out the people at risk for more pollution ?
Monte Beaver	Trinidad, CO	2017-11-14	It is high time this country start allowing our native Americans to be a part of the country. Stop using them as pawns and violating all the treaties.
Beth Garcia	Alpine, TX	2017-11-14	I stand with this tribe against this atrocity!
cetan perez-Yellowbull	Oakland, CA	2017-11-14	Fracking is horrible
David Fatica	Phoenix, AZ	2017-11-14	If the people don't want the LNG plant in there area, it shouldn't be built.

Jennifer Hadley	Katy, TX	2017-11-14	We need to start building cleaner, more sustainable energy options that are also healthier for our planets inhabitants. We can't live on a completely polluted and resource depleted planet.
Ralph Fraumeni	Levittown, NY	2017-11-14	I am totally against fracking!!!
Grace Barrak	Irvine, CA	2017-11-14	fracking is wrong on so many levels.
Edward Wood	Milford, NH	2017-11-14	As a nation we should be investing in renewable energy sources not these monolithic, literally Stone Age fuels.
Norman Stupp	NORRISTOWN, PA	2017-11-14	White man still abusing natives disgusts me.
James Brown	Seattle, WA	2017-11-14	The planet is more important than profits. This proposed plant is unacceptably risky to the environment and to Washingtonians.
mike turner	Denver, CO	2017-11-14	It is time to stop the attacks against the indigenous tribes of the world. It is time to develop and use renewable sources of energy.
Marlaena Camacho	San Diego, CA	2017-11-14	I don't want the health of people, children and grandparents mostly, to be effected. Way to much risk and toxins associated with it.
Deborah Strobel	Columbus, IN	2017-11-14	I am concerned for our planet. I don't think the damage it does is worth it. Future generations will pay the price.

George Camilleri	Livermore, CA	2017-11-14	I'm signing this petition as it's the correct thing to do. Fracking needs to stop when it comes to hurting and putting peoples lives at risk. It's not worth it in terms of profits.
Jon Brulloths	New York, NY	2017-11-14	So, the U.S. government (be it via a State government) is AGAIN reneging on its commitments and promises to the First Nations peoples of the U.S.A.Do not further destroy the land and water that supports ALL Americans - these are resources we will never recover once they have been polluted with toxic waste. Stop this injustice. Stop the greed!

Carol Bergesen	South Euclid, OH	2017-11-14	As a native of Washington state, I do not want to see this kind of "industry" permitted that will destroy the fragile fish industry and surrounding waters and land. I lived in the south Federal Way area for 20 yrs. and remember the implosion of the ARSCO (sic?) tower and the contamination of the entire area around that facility due to lead and arsenic. This facility would be no better.
David L Hanson	Vestal, NY	2017-11-14	I grew up in Kansas. I've seen the longterm effects of oil drilling -- much less severe than the effects of fracking. We're "screwed" the indigenous people ever since we (the white settlers) came here. There's way too much willingness to cave in to "big money" and not enough thought for what's "right" and what's good for the long term (i.e, our grandchildren).

Located in tsunami inundation zone, if it survives the predicted up to 9.5 earthquake, it will not survive the ensuing waves. All this, to help our commercial competitors in Asia. Marlene Donnelly	Glenview, IL	2017-11-14	There is no rational reason for a fracking facility here-- it is pure greed.
Allie Aljubori	Burke, VA	2017-11-14	what the heck is wrong with these corporations THESE ARE PEOPLES HOMES FOR CRYING OUT LOUD for all of american history native americans have gotten the short end of the stick and my god this is enough.
Diane Rupnow	Naples, FL	2017-11-14	The process of fracking infuses millions of gallons of precious fresh water into the earth but results in LOTS of toxic waste water that is not safe to dispose of anywhere. I join the Puyallup Tribe of the state of Washington in opposing this harmful project that will pollute the waterways and environment for many while making a select few rich people richer. Please save the environment for our grandchildren and their children to enjoy!

Fred Walls	Lafayette, CO	2017-11-14	I too have seen the drastic decline in sea life including fish in Washington's inland waters. I grew up near Waterman across the bay from Bremerton and the sea life is perhaps 5-10% of what it was as a kid. The clams, muscles, crabs, forage fish, and of course cutthroat and all the salmon are greatly reduced. It is time to protect the entire ecosystem.

Companies do not even have to report the many carcinogenic chemicals they release into the water. It will be too late to turn back and correct the pollution and disease burden in your state. It is immoral and unethical to recind settlement agreements and rights to clean air, water, land to these indiginous people. How many superfund pollution sites are already in your state? Are you ready for more?
Florence Wagner	Lopez Island, WA	2017-11-14	I've lived in TX. for 25yrs. I've seen the drilling..and the drilling fields. Oil is about money for the rich! That's all!! And you can believe that the big boys who make the money don't think about the little ones who get run over. The oil companies do not care about pollution: they have never been able to completely contain the remnants of their hunt for oil (the pasture lands they tear up to get to "the best spot" to start drilling...the noise pollution for folks who live around the site...the toxic pollution of small creeks that bring water to many dry pasture areas... and the hidden research !! That's the worst part. It has been proven in many research projects that folks who live within a radius of 10 miles around a drilling, or fracking, site have a much higher incidence of the following: infertility problems for both men and women ; higher rate of miscarriages; higher rate of birth defects, mostly involving the heart and lungs. The oil companies try to hide all this research. And, for me, th

Land slippage, and Earth quakes are, more common where fracking has been done. Besides the fact that they're trying to rape the lands of indigenous people, again, the big companies are not doing anything to improve people's lives. They're only making it worse.

Nicholas Stewart	Palm Coast, FL	2017-11-14	Yea, seriously how much more concrete will lay waste to our past? When is enough?! At 37 years of age I've seen the development of cities in my hometown of south Florida destroy our local ecosystem and many species of animal with as much right to this world as I, displaced like Katrina victims. I say it's enough now. We all can have what we need if greed isn't the only thing warming our hearts

Blake Thurman	Amherst, NY	2017-11-14	Native people and nations are fighting for the health of the planet and far too often they are not listened to when the industrial sector wants to do something when it contributes to their coffers while depriving other people in so many ways. Minimally, the laws and treaties between these two nations must be honored as the U.S. has pledged to uphold them. It is both an environmental issue and an ethical issue for the U.S. and not solely an issue of corporate expediency. That should come further down the list of what is right to do.

Peter Poggi	Buffalo, US	2017-11-14	We were told fracking would lower energy costs for US citizens by increasing the supply of our cleanest fossil fuel - natural gas. Natural gas is the best energy source to tide us over until we reach our goal of 100% renewable energy. SO THEN WHY ARE WE LIQUIFYING / EXPORTING IT - INSTEAD OF LEAVING IT IN THE GROUND UNTIL WE NEED IT? WHY - BECAUSE OF THE GREED OF OUR ENERGY COMPANIES WHO WOULD RATHER TURN IT INTO PROFITS AS QUICKLY AS POSSIBLE - THEN DO WHAT IS BEST FOR OUR COUNTRY!! DEATH TO THE GREEDY CORPORATE CEOs AND THE LOBBYISTS AND POLITICIANS WHO DO THEIR BIDDING INSTEAD OF FULFILLING THEIR FIDUCIARY OBLIGATION TO DO WHAT IS BEST FOR OUR COUNTRY!!

Russell Belcher	Silver Spring, MD	2017-11-14	This is the time of human beings, the "Anthropocene". We are creating havoc and destruction wherever we are. Our time is quickly coming to an end as a species if we do not change the way we view the earth on which we live. To think that our natural world is something we can consume and use up for our own benefit is the height of folly. By destroying much of the other forms of life in our world , we destroy ourselves as well.

We should demand better. <a href="https://www.archives.gov/research/native-americans/treaties" rel="nofollow">https://www.archives.gov/research/native-americans/treaties</a Look at what BP did to Louisiana and it's citizens. Workers that cleaned up onsite will die from the illnesses they now suffer. Every hurricane that hits Louisiana freshly churns the oil.

Corinne Powley	Bellevue, WA	2017-11-15	First of all this is land that is sacred to the First Nation People.Secondly, the effects of fracking has been widely studied and scientists agree that it is not a clean source of energy.A growing body of evidence shows that people both near and far from oil and gas drilling are exposed to fracking-related air pollution that can cause at least five major types of health impacts, according to a new comprehensive analysis of scientific studies to-date by the Natural Resources Defense Council. The health impacts include respiratory problems, birth defects, blood disorders, cancer and nervous system impacts, raising serious concerns for workers and people living closest to wells, as well as entire regions with high volumes of oil and gas activity.

It would create an immediate and unreasonable danger to the thousands of people within three miles of the massive storage tank and would require a steady supply of fracked gas from offsite wells. Communities living near those wells would be exposed to toxins and carcinogens used in the fracking process. NONONONONONONO

Malcolm Gillespie	Marcellus, NY	2017-11-15	With the green technology we have available today it is inexcusable to continue to advance our dependence on fossil fuels. Burning anything for energy will be looked back on by future generations as the dumbest thing our industrial society ever did to itself. Let's evolve sooner rather than as a reaction to fouling our own nest. Once the damage is done, it lasts for centuries. I have seen it first hand many times.

E. C. Marullo	Fort Worth, TX	2017-11-15	The question is: why would anyone think that doing this is a good idea or even want to do something that would harm the people and wildlife not to mention destroy the environment in this beautiful land.
tom m	Marquette, MI	2017-11-15	We need to preserve the planet, not big business. If they put the time and effort into clean energy research rather than fracking and refining fossil fuels we would be moving in a very positive direction. At the rate we are going now, I don't even know if I want to bring children into this world. Before long there will be no more planet to destroy. The conservatives hide behind "creating jobs". Most people don't realize they only create jobs for a very specific demographic. I haven't benefited from these new jobs one bit. Most of us will actually be hurt by the "jobs created" by the conservatives. We all need to sign petitions to IMPEACH TRUMP!
Karen Rund	Oxford, NC	2017-11-15	This plant makes no sense to anyone but the gas companies. It's long past time to stop building more of these polluting plants, especially in an ecologically sensitive area like the Puget Sound. And Native Americans have had far too much snatched from them already. Save Mother Earth and her peoples from this travesty.
tom m	Marquette, MI	2017-11-15	Fracking rapes the planet. Plain and simple. Animal agriculture as well as every part of using fossil fuels is nothing but destructive. Corporate greed is so blatant these days it is amazing they are still getting away with it. We can all make positive steps toward protecting OUR planet by signing petitions to IMPEACH TRUMP!
tom m	Marquette, MI	2017-11-15	I believe the worst thing that happened to this country was European colonization. This could very well have been the greatest country in the world if Europe never invaded. The native Americans had the right philosophy and Europe came and raped, pillaged, and burned and now this country is one of the top polluters in the world and getting worse every single day trump is in office loosening EPA regulations and feeding corporate greed with a silver spoon.

If you were to put this in a car you would get well over 200 miles to the gallon. This is only one example of corporate tyranny we face in these modern times. The M1-A1 Abram has a locomotive engine and every time it is cranked even to warm it up a meter on it's side keeps up with the running time and the military has to pay royalties to the Railroad right down to the second. That is to say the we tax payers. we must vote out those who encumber us in our endeavor to save the planet. Leslie Smith	New Orleans, LA	2017-11-15	It shames me as an American that we have kept no faith at all with the Indigenous Peoples of North America. -Now the people that we have broken EVERY treaty with are trying to save us from ourselves; when we destroy the water, we die. That's it. You can't live without water. THEY FRACKED MY WELL WATER AND I CAN'T DRINK IT! This was over 25 years ago on my grandmothers land in Alabama. I bought land from her, built a house, sunk a well. The water was fresh and fantastic- Then they came in with slant drilling for coal-bed methane. Now My water is poisoned. 25 years and I still can't drink it. After they came in, we could light it on fire out of the kitchen sink! God bless the Native peoples that are fighting for our survival. Please, research this. Look at the science. Fracking uses MASSIVE amounts of water in the process, and then ruins the remaining water for the future. Fracking causes earthquakes. Google it. Fracking causes cancer, kills animals, makes people sick in all kinds of ways, causes birth defects

Mary Smith	Tacoma, WA	2017-11-18	Fossil fuels should stay in the ground. We should be creating green jobs and retooling industries for an environmentally sustainable future. To hang onto this antiquated and outmoded fuel source is to endanger the planet and possibly even human existence in the near future. The process of producing LNG is water intensive and releases large amounts of methane into the environment. Water is a finite resource and methane contributes to global warming. Both poles are rapidly melting and Frank Fenner, the creator of the smallpox vaccine, predicted that a child born today could live to see the extinction of man. This is not acceptable. We need to democratically take control over these industries and manage them or dismantle them for the good of people and the planet. That is socialism.

Tammy Scoby	Kelso, WA	2017-11-19	Fracking has already proven to increase earthquake activity where there should be none, ie Oklahoma.... NO2LNG, NODAPL, NO TO BIG GREEDY CORPORATIONS CONTINUING TO RAPE MOTHER EARTH TO LINE THEIR POCKETS!!!!
Malorie Mikesic	Kansas City, KS	2017-11-19	Just stop...I'm tired about hearing/reading all the horrible & injustice things we still do in 2017 to Indengenious People! As a country, let's do the right/correct thing that is equal for everyone. I never knew it was a lot to ask for, but let's live by our motto "land of the free".
Judith Fordham	Coburn, PA	2017-11-19	I am so tired of rich corporations thinking they can just ruin lands, displace folk that have legal right to live, and cause so much sorrow and ill health. We need our salmon we all need our rights defended.
Carol Shand	Costa Mesa, CA	2017-11-19	I love this area and it's not place for fracking!!
Charlotte Maloney	Eugene, OR	2017-11-20	These salmon people need the salmon for their lifestyle- not only for food. Do the right thing for them.
Joy Davidson	Aurora, CO	2017-11-20	If fracking and oil pipelines are so safe, where did all the fish, frogs, and birds that were in the creek behind his grandparent's house go?
Wanda Leon	Alabama	2017-11-20	A safe environment for our children and preservation of mother earth is everyone's responsibility. Making profit cannot blind us.

Robert Meek	Interlaken, NY	2017-11-20	This facility will be extremely detrimental to the salmon and the people who need the salmon to survive. It must not be built. Governor Inslee, you must not let this facility be built.
Christopher Hill	Sammamish, WA	2017-11-21	It's thanksgiving time, can Native Americans be given something to be thankful for instead of something to fearful of?
Andrea Kraus	W. Hollywood, CA	2017-11-21	Orcas are in decline in Puget Sound and pollution is very much to blame. This special and beautiful area does not need the danger of a LNG facility on top of it! Clean up the Puget Sound - don't add to the pollution.
gail date	woodinville, WA	2017-11-21	Give tribes the rights they deserve!
Mirinda Hart	Myrtle Creek, OR	2017-11-22	I am signing this petition for survival. The denial of this project, and projects like these, are paramount to the survival of the human species on this planet. Not only are clean air, water, and food basic human rights, they are IMPERATIVE to human, plant, and animal EXISTENCE. This project, and others like it, threaten our very survival and existence. I am signing the petition because we cannot afford this. Approval or advocacy of this and other projects is the approval and advocacy for suicide. I stand with the Puyallup Nation and all of humanity against all LNG projects!
Jonathan McCoy	Los Angeles, CA	2017-11-22	It's time to stop the genocide of indigenous people and pollution of indigenous peoples' land.

Marlona Reid	Maple Falls, WA	2017-12-05	fracking is dangerous to the entire state, we need to stop this type of activity now and for good. We only have one planet to call home.
Paula Kathleen Dawson	Seattle, WA	2017-12-05	It's unconscionable that we in the beautiful northwest, who know the damage this facility would do, should allow it to be built in our midst.
Elizabeth Heath	Seattle, WA	2017-12-06	We must protect our land from exploiters who are merely profit motivated.
Tahnya Jones	Destin, GA	2017-12-06	Fracking is NOT safe!
Tawnette Harris	Tacoma, WA	2017-12-06	This is unacceptable and needs to be stopped.
Robin Demmerle	Kirkville, NY	2017-12-07	Stop polluting our water is why!
Art Oliva	West Palm Beach, FL	2017-12-07	Down with oligarchy especially fracking
Henrietta Wise	Olivebridge, NY	2017-12-07	STOP THE WAR ON OUR ENVIRONMENT. I'M 80 YEARS OLD AND HAVE NEVER SEEN SO MUCH INJUSTICE TO OUR LAND!!!!!!!! NATIVE PEOPLE SEEM TO HAVE THE ONLY SENSE IN THIS TERRIBLE DESTRUCTION OF OUR WATERS AND EARTH. STOP IT!!!
Pamela Tufts	Seattle, WA	2017-12-07	I'm signing because LNG and fracking are last century solutions. We know better now and must stop this madness.

Carissa Sharpe	Seattle, WA	2017-12-09	We ALL need to do everything we possibly can now to save our environment and country from the constant daily attacks coming out of Trump's DC.
Julie Chavez	Burlingame, CA	2017-12-09	We need to see the ecological balance of nature has to be protected over the potential economic gain. What is the point of going forward if there is no more land or food to eat ? Those are the consequences of such dubious practices. Your profit margin will mean nothing at that point. Why can't you see it? Everyone else can.

			of toxins. Gas also escapes into the atmosphere during extraction adding to air pollution.
Jane Stackhouse	Portland, OR	2017-12-11	The Salish Sea is no place for oil or gas. We have polluted it beyond belief over the years. Climate change has made the South Puget Sound waters too warm for salmon.Climate change is caused by CO2 and methane in the atmosphere. These disruptions cost billions of dollars in damages and will continue as the earth's temperature warms and the ice caps melt.The time to act was thirty years ago. We cannot delay one more day. We must move to renewable energy. Fossil fuels are obsolete and are destroying our earth.Real renewable solutions are available. We must invest in these new technologies.
Bobbee Murr	Portland, OR	2017-12-11	Sisters and brothers, guardians of this great Earth, thank you.
Erika Shriner	Bainbridge Island, WA	2017-12-11	It's time to start listening to our tribes - what we have done to their lands is a disgrace.
Michelle Kloppman	Seattle, WA	2017-12-11	Our natural resources and people's way of life is threatened by tracking and continued reliance on fossil fuel. We should be using safer renewable methods. Protect OUR water for ALL
Brook Bailey	Aberdeen, WA	2017-12-11	It's the right thing to do.....
Cheryl Torrey	Malibu, CA	2017-12-11	I am signing because water is life and we keep dishonoring our Earth, not taking care of our planet and the people in it. That is the most important issue
James Pona	St Louis, MO	2017-12-11	We need to move away from fossil fuels. Period. I support this individual and a majority of Americans who would agree with my first statement.
Deborah Capps-Thompson	Greenwood, IN	2017-12-11	Please have some decency and honor the little the Native Americans have remaining. We so called Americans took almost everything from them except their heritage and pride. They are a beautiful people inside and out.
Sandra Campbell-rex	Bonnyman, KY	2017-12-11	Why isn't the state protecting the lands
Stephanie Gardner	Clinton, MD	2017-12-11	I'm signing because it's the right thing to do.Peace and blessings,
Susan Greive	Pompano Beach, FL	2017-12-11	I'm signing because I am so sick of our government destroying our lands for fossil fuels when there are so many other options.
Alison Laurio	Strasburg, VA	2017-12-11	I am signing this petition because I lived in Washington when we were told the Hanford site was not leaking. No surprise: it was. All this crap leaks. Sometimes things explode!!! STOP THIS PROJECT!
alea tuttle	Charlotte, NC	2017-12-11	the risks are too high, we need more renewable energy
Josh Weinstein	Boulder, CO	2017-12-11	I support people over corporations and alternative energy.
Ruth Baxter	Jackson, TN	2017-12-11	Enough.....outlaw fracking before it is too late!

N A	Port Huron, MI	2017-12-11	I as a white man can even see the racist actions being carried out in the name of greed and profit in this situation! PSE needs to be stopped from destroying the environment and these indigenous people. Also as a Michiganian, I understand very well how important it is to have clean water and such, as my state is pretty much encircled by it.
Shirley Boucher	Roy, NM	2017-12-11	I'm tired of the government disrespecting the land of native Americans. And, not supporting renewable energy instead.
Smara Voglesong	Medford, NJ	2017-12-11	Time to put people’s safety/well being and our environment before the greed of devastating companies.
Jan Ellen Burton	Salt Lake City, UT	2017-12-11	Clean energy is the wave of the future.
Mary Spreitzer	San Diego, CA	2017-12-11	Fracking is a dangerous step backwards in our use of energy. Sustainable energy sources are the only reasonable and acceptable forms of energy in a world at the mercy of climate change.
Kim Fay	Los Angeles, CA	2017-12-11	Born and raised in Washington State, I grew up with great respect for our region's Native American tribes. Their culture and lands are integral to our history, and I am infuriated that their health, well-being and rightful claims are constantly being sacrificed by big business interests. On top of this, fracking is simply bad for our planet. I implore Governor Inslee to protect our state's heritage and health.
clifford slayman	Hamden, CT	2017-12-11	Corporate greed is the very heart of Trumpism. And the combination of corporate power and governmental control is...FASCISM. That is even worse for America than the onslaught of global warming with the fossil fuel companies tout purely for the greed.
Robert Walker	Oakdale, MN	2017-12-11	We need to back away from fossil fuels. 50 yr. commitments are to risky for everyonebb
Thomas Moher	Rifle, CO	2017-12-11	Enough fracking, make the investment in sustainable energy and create jobs while protecting your grandchildren's environment.
Suzanne Lenora	New York, NY	2017-12-11	Clean water is the most important ingredient when it comes to health care. If you care about health care, start with the water that comes from your faucets at home.
Phyllis Breit	Skokie, IL	2017-12-11	The repugs must stop trying to destroy America; the cretins must be punished severely and removed from the White House.
Lou Gable	US	2017-12-11	It's the right thing to do.
Lynda Hayes	Rio Rancho, NM	2017-12-11	There has to be environmental protections put into place to protect the health and safety of the public, as well as their water. This is more important than profits from the oil and gas industry.
Jeff Sjolander	Northtown, MN	2017-12-11	Now especially more than ever I can remember the fossil fuel industry is deliberately endangering our future for profit. America must do better for future generations.

Dena Turner	Portland, OR	2017-12-12	I stand with the Puyallup Tribe for Native American land and water rights. Additionally, LNG fracked gas must be kept in the ground. It is a huge source or ground water and other pollution and an unacceptable source of methane gas. Keep the methane gas out of the air and in the ground in order to save the climate and our planet! Humans and other species are at risk. Do not put humans and other species at risk so that a few corporate elites can make money!
David Wright	Seattle, WA	2017-12-12	Fracking is the most dangerous thing we can do to our land: once the gases escape and cannot be contained, we are stuck with toxins and polluted groundwater forever. Sometimes our rivers, and land catch on fire from escaped methane gas, hundreds of feet to miles from the wells. The process also causes earthquakes. This could trigger much bigger quakes here, that can cause major damage.Fracking must never be realized here in Washignton.

N A	Elkhorn, NE	2017-12-12	I want to honor our commitments to Native Americans, for a change.
Paulette Bernard	Metairie, LA	2017-12-12	I value the ecology over oil and greed. It's way past time to restructure the economy away from fossil fuels. Get it done or go home -without pay.
Shannan Stevens	South Lake Tahoe, CA	2017-12-12	Mni wiconi.... Water is life
Gail Mershon	Philadelphia, PA	2017-12-12	Native peoples have the right to protect their own land...we are the immigrants on their land and have no right to defoul it!
Barbara Miller	Indianapolis, IN	2017-12-12	Fracking will destroy our environment.
Molly Matter	Vashon, WA	2017-12-12	As an American and a descendant of immigrants to this country on Native land, I am responsible.
John Burns	Oak Forest, IL	2017-12-12	This is another example of why we must begin 45's Impeachment TODAY! He is guilty of Collusion, Corruption, Conspiracy, Witness Tampering. Obstruction of Justice, and TREASON!....And possibly RAPE of a minor.
Victoria Hill	Brier, WA	2017-12-12	STOP DESTROYING THE PLANET WITH USELESS OIL AND GAS
Sharon Budweg	Spokane, WA	2017-12-12	I stand with indigenous tribes and send my love and support for our Mother Earth ###
Carol Spencer-Coons	Burien, WA	2017-12-12	It is right and just to care for the land and water. We have a responsibility and a basic need for/to Mother Earth.
Tonya Valadez	Eugene, OR	2017-12-12	Leave Indian land alone!
Rainer Judd	Monahans, TX	2017-12-12	I stand with the Puyallup Tribe. Sovereign. Stewards. Orca, salmon, Salish Sea. Love and respect from West Texas where we are getting pipelined and fracked in the last 2 years.
Elizabeth Heath	Seattle, WA	2017-12-12	I support the Puyallup Tribe in their campaign to protect our precious world.
Colleen Gray	Tacoma, WA	2017-12-12	Why are we allowing a foreign-owned company to violate Native treaties? Why are ratepayers being forced to pay for the LNG? Why are we taking on the liability? The environmental risk?
Paul Temple	Concepcion, Dominican Republic	2017-12-12	Water is needed for life. Oil is not needed, we have modern alternatives. Don't ruin what we need for something we don't.
Kathryn Lincoln	Los Angeles, CA	2017-12-12	This is important.

Eileen Hawes	Portland, OR	2017-12-12	I support the Puyallup Tribe and citizens across the Pacific NW coast who demand an end to the LNG facility project on the Puget Sound.
Tom Reese	Ramona, CA	2017-12-12	It is time to move away from fossil fuels and to renewables.
emily herbert	Portland, OR	2017-12-13	Our agreements with the Indigenous are important to keep. Pipelines always break.
Rebecca Wolfe	US	2017-12-13	This planet is all of ours, not the fossil fuels companies.
victoria redstarr	Spokane, WA	2017-12-13	Fracking is dangerous - to people as well as to Mother Earth and must be stopped completely.
Denille Fleming	Monroe, LA	2017-12-13	I support Native rights!!!
Rudy Salazar	Olympia, WA	2017-12-13	I believe in a safe and clean community for all
Faith Blanchard	Wenatchee, WA	2017-12-13	How is fracking going to affect both a precious culture and the fault lines that run through Washington? No thank you, fracking!!
William Jacoby	San Jose, CA	2017-12-13	The US need to honor its treaties.
Susan Daley	Yarmouth, ME	2017-12-13	Fracking will eventually ruin the underground water supply so that there will be no,water safe to drink in areas that have been fracked. Why else do you think that the oil and gas industry demands that they be exempt from clean water rules under the EPA and had Trump appoint Pruitt to run the EPA and gut clean water standards? These oil and gas companies are evil, greedy criminals. They ought to be forced to drink fracking water themselves. This is an abomination! Someday no place in America will be fit to live in due to toxic waste and pollution. Just because you can't see it does not mean that it is not there. Please stop these motherfrackers!
Madalin Behrman	Douglasville, GA	2017-12-13	We owe Native Americans so much. Let's not continue to take and ruin their land over and over.
emily may	Huntington, NY	2017-12-13	Please stop the fracked gas facility! This is the wrong direction to move in for the future of energy- every aspect of fracked gas is harmful: Fracking uses enormous amounts of water that we can no longer afford to waste. The billions of gallons of chemicals used in this process are contaminating our underground fresh water. Abandoned fracking sites are ruining the landscape. Fracking is destroying the integrity of our bedrock, resulting in earthquakes and sink holes where there never should have been any. Tons or polluting gases are released during the fracking process, exacerbating global warming and defeating the whole point of natural gas as an alternative fuel. Leaks along these pipelines pollute and endanger all life along the way. Please block this facility near the Salish Sea!!!!!!!!!!

jan zimmer	Federal Way, WA	2017-12-13	LNG is not “clean”, it is a fossil fuel. PSE doesn’t have all permits for this plant, yet is building it.Jay Inslee is always talking about reducing greenhouse gases and carbon pollution, he needs put his money where his mouth is. Inslee as a Democratic legislator who is supposed to be fighting climate change should never approve of this project, this is pro big business project and anyone who supports it supports big business to the detriment of citizens living around areas where fracked gas for this project is coming from.

Joni Rawdon	Whitehall, MI	2017-12-15	I'm signing not only for this area for fracking, but for all areas where new fracking is starting. This is hurting our planet, people and the air we breathe. In one area of fracking it causes harm to so many other areas. Do you know just in the United States we now have 5 CRITICAL fault lines? They are all capable of producing great destruction. I wonder how many we had before all this drilling into our beautiful land.
kay Glennon	Australia, ND	2017-12-15	water is life- cant eat oil, cant drink gas .Polluted water can never be made clean again.. First nations people should have rights to decide what happens on their ancestral lands.Too much greed in the world .

Jennifer Smitherman	Grand Rapids, MI	2017-12-19	We can't let this go on any longer. The American Native People have the same rights as I do. My rights are violated as their rights are violated. I am an American and I am not going to let this happen. This is all of our food, water, and air. These are all of our Salmon and wetlands. These are all of our LAWS AND RIGHTS AND JUSTICES. When we look the other way, we put ourselves in danger. We need this to end everywhere- this mistreatment of others because they are human and not corporation. THIS IS MY PLANET, AND I WILL HELP PROTECT IT. This is the food and breath and healthy environment we have left. It will not renew once it is destroyed. Their backyard is my backyard, their health is my health, their rights are my own rights. I sign here because I believe the corporations are not more than the needs of the people and the planet. Aquit environmentalists. They are HEROES not criminals. They did what was necessary to bring a crime to light.

David Donohue	Bellingham, WA	2017-12-19	I stand with the native American communities in demanding the cessation of fossil fuel development. It is killing the environment we require for life. Stop, now, while there's possibly still time.
Sally Laurie	Poulsbo, WA	2017-12-19	I am proud to live in a State that cares about the environment. Governor Inslee, you say you care about the environment, please prove it by stopping PSE from polluting our waters, and honor the treaties for our Native neighbors. Isn’t it time to show the rest of the country how to do this. Standing up to big corporations, whose only interest is making their CEO’s wealthy. Please stop this!!
Michele cross	Vancouver, WA	2017-12-19	I want clean air and clean water for our children.
Colleen Taylor	seattle, WA	2017-12-19	This is not land to be bought and ravaged for a natural "resource" that is better left alone. Better for future generations, better for the land that the Puyallup tribe is working so hard to protect.
Amanda Baker	US	2017-12-19	I stand because what they are doing is wrong. Everyone deserves clean water. The Salmon need to live.....
Dennis Akins	Holyoke, MA	2017-12-19	I can not support this destruction of our Environment! No Fracking!
Marion Rougui	Birmingham, England, UK	2017-12-19	I'm signing because Mni Wiconi means Water is Life
Susan Trefts	Olympia, WA	2017-12-20	I'm signing because LNG is dangerous and on Native land.
Abigail Mnookin	Brattleboro, VT	2017-12-20	Water is life and climate change is here and now. Keep it in the ground!!!
Scott Winters	Amesbury, MA	2017-12-20	Leave it in the ground.
Kim Nelson	Fayetteville, AR	2017-12-20	This is not needed we have plenty of fuel! Please stop destroying God’s planet.

Kaärsten Furman	Washougal, WA	2017-12-21	We need to focus on clean energy. No fracking!
Bonnie Lawlor	North Bend, WA	2017-12-21	It's wrong on so many levels.
Christian Mccollam	US	2017-12-21	I may be part cherrokee but fr now i speak agianst all imagrents european african you name it.... Im not racest im just saying we need to start honoring this land like the ansestors before the indigenous people of today did.... Start by reallizing the harm we are doing then what we can do to fix it..i feel that if we get enough signatures in we may fix whats been broken.....An old tsulagi elder once told me " Theres a war going on within not just ourselves but our world its a wqr between two wolves the good wolf and the bad wolf is greed anger jealousy hate and destruction and the good wolf is joy playfulness happiness and hospitality. I asked which one would win?? He replied.... The one u feed.....you decide which wolf u wanna feed!!!!
Fran Lawren	Issaquah, WA	2017-12-21	I stand with the Puyallup Tribe of Washington State! No liquified fracked gas facility in the Salish Sea!
Linda Brewster	Port Townsend, WA	2017-12-21	People's rights are just so inconvenient to the corporations. The tribes have been ignored for long enough!!
Roxanne Glick	Seattle, WA	2017-12-21	The Puyallup Tribe are excellent leaders in demanding clean water, clean air, environmental justice and safety for our communities. As caregivers of this land for far longer than this country has been in existence, we need to follow their lead in stopping the construction of LNG in Tacoma or anywhere.
Chandler Elizabeth	Eugene, OR	2017-12-21	I am signing because it is the moral thing to do. Our children's future and all that is living is at stake. Time for regeneration of all that has already been lost!
Gill Fahrenwald	Puyallup, WA	2017-12-21	The only thing that's sacred to a Republican is the almighty dollar. That's their real god. Greed and corruption is going to kill us all.
Angie Dixon	Clinton, WA	2017-12-22	We need to move into energy sources that are sustainable for the future, that are not polluting and damaging to our water, air and land.
Louis Vontver	Seattle, WA	2017-12-22	It is not only because of the fracking in the Production of liquefied natural gas, it is the burning of it which increases the carbon dioxide and potentiates planetary warming.
Richard Jones	Renton, WA	2017-12-22	This project is heading us in the wrong direction, as well as once again placing energy and economics ahead of Native American

Sigrid Asmus	Seattle, WA	2017-12-22	The plan -- by *unaccountable* corporate interests* -- to site a massive, dangerous LNG facility on earthquake vulnerable, unstable land near the Salish Sea is not acceptable. Not only would this unwanted and dangerous facility harm the Puyallup Tribe's way of life and break treaties the US has signed with the tribe, but it would be sited in a populated area vulnerable to all the toxic components needed to create and ship LNG. Further, the shipment of any LNG would be vulnerable to the dangerous currents in our irreplaceable Salish Sea environment. There, only one accident by a single tanker could in a single day permanently destroy a huge portion of the Salish Sea environment, and its irreplaceable marine life. Yet this project plans to bring in some *800 tankers* that would load and carry the LNG across the Salish Sea to be burned elsewhere. This is not acceptable.I stand with the Puyallup tribe and Washington State's environmental protections against the building of any LNG facility as well as any manufact

Lisa Spoonts	Auburn, WA	2018-01-11	LNG does not belong in the Tacoma area!
Jeanette Bugay	Seattle, WA	2018-01-11	Fracked gas (LNG) puts all of us in danger. We need to retire all fossil fuel projects and not build new ones.
N A	Lincolnwood, IL	2018-01-11	Protect the waters and what it brings to the Puyallup Tribe.
Amy Cadwell	Lake Forest Park, WA	2018-01-11	It’s vitally important to protect the climate and our only home! Make the right choice.
Antonia Ihry	Kent, WA	2018-01-11	I am signing because the current President and his cabinet are on a down hill slide to kill Mother Earth and that must be stopped. Peace....
Miriam IOSUPOVICI	Imperial Beach, CA	2018-01-11	Fracking is insanely dangerous for the planet, We know this now irrefutably from scientific research. That salmon may well be endangered is an insult to the Puyallup Tribe, recovering from broken treaties and settlements already. STOP. Do the right thing. Liquefied gas is now also known to be harmful in use, not safer. NO REASON TO CONTINUE.
Mary Brooks Tyler	Oxford, MS	2018-01-11	Honor the land claim settlement. Stop destroying the land and endangering.
Rima Petrutis	Naperville, IL	2018-01-11	STOP...you will destroy something irreplaceable.
Angela McLaughlin	Orleans, CA	2018-01-11	For or children n the future!
Troy Storfjell	Tacoma, WA	2018-01-11	As a resident of Tacoma I am appalled that something this dangerous is being forced into my city. Worse, it's being forced onto the Puyallup Reservation, in violation of treaty terms, which ought to make it illegal.
Susan DuFresne	Vashon, WA	2018-01-11	I am a public school teacher in Renton School District, working in a school that is built on stolen Indigenous land. We have done too much damage to the planet to feed patriarchal greed for profit and power. Instead we must protect the future of our shared planet for all children and living things. I stand in solidarity with the Puyallup water protectors. #NoLNG

Yesenia Garcia	North Bergen, NJ	2018-01-11	When will we put an end to this injustice to nature and He compromising our future? What will it take to have it be enough?
Robin Michel	San Francisco, CA	2018-01-11	As stated in the petition letter: "We stand on the edge of global environmental catastrophe. Massive climate change disasters are destroying cities and communities across the globe. Three hurricanes have blasted the Caribbean, and two earthquakes caused major damage to Mexico City. We are all stunned at the intensity, frequency, and devastation of these disasters. Historic forest fires have burned hundreds of thousands of acres all over the west, the Pacific Northwest, and Canada..." We must do all we can to protect this planet now.

Will French	Santa Rosa, CA	2018-01-11	We need to leave fossil fuels in the ground and develop more clean energy.
Dorothy Hiatt	St. Louis, MO	2018-01-11	I am signing because I believe fracking is dangerous to our existence. Further it is unnecessary as sustainable energy sources are available. If the money invested in these awful projects were invested in sustainable energy, everyone would win. So why aren't we doing that????
Anna Hepner	Brunswick, GA	2018-01-11	Well duh I care for nature and I also would love to make sure future generations aren't affected by what this plant could be doing and you're trying to remove something that's been there for generations not cool bro
Anita McInnis	Bellflower, CA	2018-01-11	The land belongs to the Tribe. This MUST be Stopped!! No amount of money in your pocket will be worth the lives you will destroy if you allow this plant to be built. I suggest you seriously consider the consequences of this action. It will be detrimental to the tribe and to the whole state if you let this pipeline be built.
patricia satterlee	Upland, CA	2018-01-11	We are All connected....every living thing is to be protected and appreciated..and where there is a problem or threat we must work and live together ..we must do our part. Thats why the least I can do is sign this petition.

brandi peterman	White Cloud, MI	2018-01-11	I am signing this petition because , it is being to close to people it sounds dangerous to the residents water and if the liquid gas turn back into gas it can explode . So I feel it being built to close to people . Build it where there are not people . Why do you have to build in the backs yards of home where children are being raised . Children are the future and if you build this they will see the I'll effects of this and when they grow up . You will have more people against the oil gas and energy corporations because they will have lived with sick and dying family members . So you are creating your own enemy's . Thank you please stop this from being built

Pegge Meyer	Pequot Lakes, MN	2018-01-11	I'm signing this this because we have got to STOP this whole crazy dependency on fossil fuel. Fracking, drilling, mining. We are destroying the environment slowly, but surely. Yes, this is a definite hazard for the Puyallop tribe, but in the end it will be all of us. We have the technology for wind and solar, that's where we need to concentrate our efforts. The environment can take just so much before it collapses.

Water is essential to all of us and it is being treated as an infinite resource. The indigenous people's rights to unpolluted water and safe and beautiful living space that respects their right to make a living from the salmon in a sustainable way, should definately be protected.Who are we as a people if we do not honor our land agreements? Corporations and particularly those in the fossil fuel industry deny how nature is reacting to our bad decisions. Those that see nothing wrong with risking others well-being and livelihoods or doing blatant harm to others because of their greed, need to be held at bay, and accountable for all harm and disregard for others rights and needs.

Carol Carman	Alliance, OH	2018-01-11	The LNG storage is being built in a fragile ecosystem and should be stopped. In Ohio lakes the fish have mercury, lead, and dioxans making consumption unsafe. Please don't build the facility which could contaminate salmon forever. The purity of Washington state is what people like and don't turn it into a contaminated region.

elvira lopez	pembroke pines, FL	2018-01-11	I do believe these pipe gas lines are a danger to our people and to marine life, our environment, our food, our people. It's a huge mistake not to listen to the people directed affected by proliferation of gas pipelines. WE OUGH TO STOP IT!
rick tamburo	merchantville, NJ	2018-01-11	Fracking must stop !
Shannon O'Brien	Palm Bay, FL	2018-01-11	Please forgive us for what we have done. As I traced my family history I discovered that my family has been in America since we were just 13 colonies. And as a person who years ago stopped celebrating thanksgiving as I saw it as a celebration of the terrible things we did to all of the tribes in America. That we didn't so much "discover" something that wasnt there as much as steal, murder & over throw a nation of people. I am ashamed by that. I am ashamed still at the continued behavior of our government and the way it has treated the nations tribes. So, please accept my apology & know that I stand with the tribes. Always!

			the indigenous nations. We are at a critical point, there may not be enough time to change any of the damage that has already been done. They should make every effort possible to prevent any more destruction from occurring, not adding to the devastation. Kyle Solis	Deer Park, NY	2018-01-11	The Native People's of this land have the absolute right to THEIR land and THEIR resources. These things should NEVER be tampered with, put at risk, or taken away for them. Ever. This is much deeper than just a very serious environmental concern, this is also a serious matter of human rights and the preservation of indigenous culture. The people of the Puyallup Tribe are completely entitled to their resources for survival just as we all are as human beings. These resources also directly impact their culture and way of life. To put their resources, as well as our environment at further risk through this project (which most likely was designed entirely around corporate greed with lack of compassion for fellow man to begin with), is to put the entire culture and way of life for a tribe of fellow human beings at risk. This cannot be tolerated, ignored, or allowed. We saw what the government did to Standing Rock and the good peoples of the Sioux Tribe.....I haven't wept that hard and for that long in a very long t

Katherine Scarritt	Denver, CO	2018-01-11	Fracking is harmful to the planet. We need to move to sustainable energy sources. And we need to respect Indigenous People's rights.
Susan Ulrich	Otterbein, IN	2018-01-11	We need to protect the environment and people of this nation from dangerous developments expecially in inappropriate locations. Hannah Black	Spring Hill, TN	2018-01-11	It is not right to continue destructive processes like this for profit when renewable sources of energy are just around the corner.
Judy Roberts	Tacoma, WA	2018-01-11	How dare we allow our water, land and air be at risk and place the people of Washington in harms way for the profit of the few. You cannot continue to turn a blind eye to our recent history of oil spills, fracking quakes and total contamination of land, air and water. We must honor the privilege of being a part of this Planet and begin to move forward to save her and her citizens. Move away from outdated, archaic energy sources and be true to the possibilities that are offered through clean sustainable energy production. You are in your position to represent your constituents. Do not kill the masses for the benefit of the few who know exactly what price will ultimately be paid when the catastrophes begins. WHO WILL TAKE RESPONIBILITY THEN??? The profiteers will not take responsibility. It will fall on our tax dollars to clean and salvage what we can. By then it will be too late. Land, sea and air will be lost. Hell of a price to pay.

The Puyallup Tribe might seem like a small enough group of people to sacrifice, but the reality is that damage spreads everywhere. Everything is connected, ventilated, mixed, poisoned and recycled beyond the point of origin so much so that the entire planet is affected. Amanda Sears	Costa Mesa, CA	2018-01-14	Im tired of the oil industry thinking their profits are more important than the planet or the people. There are alternative resources to be invested in. Fracking is a huge investment, its poisoning the water & messing with fault lines. Stop Fracking Now! There is profit to be made in alternative resources if that is the only concern. Governor of Tacoma, be green & concious like you claim. Put a stop to this. Its odd to me that thr government & oil industry are doing this at once to several tribes around the country. I do mot support this. Do not continue to break treaties with the tribes anymore. Enough treaties were broken. Its 2018. Where is the intelligence? Humans supposedly evolve to become more enlightened. This is barbaric behavior! Honor your words Governor.

Here in the SE part of the state, we have already seen water reservoirs-reserves underground that have have been contaminated by the fracking efforts on property or nearby. It is fairly quickly seen on the ranches who were seduced by oil contracts that w're believed to heal a starving ranch, but instead has ruined the farming and ranching potential, not even to day the spoiled water for human consumption, for the long-term. It he potential for money and the good sales efforts by the oil companies for short-term gain has destroyed the long-term gain and in areas where the reserves are even larger, the effect could be truly devastating for hundreds of years. Don't let family caking come to your area and spoil what you love the most...life, your children and grandchildren, the taste of clean PNW water!

Katy Fulton	Bremerton, WA	2018-02-09	The Salish should be able to make decisions about their own environment, just as we all should. I'm tired of big corporations and their lack of moral integrity.
Barbara Montgomery	Saint Helens, OR	2018-02-09	Fracking in the Salish Sea is completely unacceptable. It is already a high risk seismic area and fracking increases seismic activity. The Sea is the primary habitat for the endangered Southern Resident Killer Whales. Fracking would introduce damaging explosive noise, increase marine traffic and increase the risk of deadly spills. This is not a risk we can take, our orcas are already at risk of extinction.
Frances Oates	Seattle, WA	2018-02-09	Fracking is an inherent danger to our land and environment. The options available for sustainable and clean energy must be promoted and enhanced!

Anne Weaver	Port Townsend, WA	2018-03-05	I write to express strong opposition to BOEM's Draft Proposed 2019-2024 OCS Oil and Gas Leasing Program. The expansion of offshore oil drilling would cause enormous negative impacts to marine ecosystems, coastal communities, and vital recreation and tourism industries.Offshore oil and gas development off the West Coast would require seismic surveys, drilling operations, oil transport by tankers, and the installation of platforms, pipelines, and other infrastructure. Collectively these activities would significantly damage the environment, marine wildlife, and coastal economies and ways of life. New offshore drilling would also expose the marine environment and coastal communities to the risks of another catastrophic oil spill.

Brenda McManama	Shinnston, WV	2018-04-05	Lawmakers / regulators must deny the permit(s) for this and all future plans for LNG storage tank(s). The combined threats from the fracking industry do not justify expanding this infrastructure.The extreme extractive economy destroys everything in its wake! From cradle to grave the negative consequences cause suffering-death, sickness for humans, animals, and ecosystems-far reaching from the point of extraction, refinement, manufacture of consumer goods, emissions, and disposal. It's way past time to transition from a destructive economy to a regenerative and resilient system.
Ruth Wallace	Saint Thomas, Canada	2018-04-06	The practice of fracking is too damaging to the environment and communities to warrant its expansion. The amount of fresh water alone that is used and permanently removed from finite fresh water reserves when many states are experiencing ever intensifying water crises is outrageous and grossly short-sighted. But everyone knows this, including those companies engaging in the practice. Profit before people, profit before the planet, the hell with anything else: capitalism at its finest.

Angie Dixon	Clinton, WA	2018-06-24	I signed this because fracking is highly polluting of water and uses too much water for a resource we need to stop using ourselves. It endangers our planet and the life support system we depend on for our lives too. We also must protect our wild salmon runs and the Southern Orca pod is in deep trouble - mainly from not having a healthy ecosystem to support them. WE need to value and protect the natural resources we have, not destroy them and then wonder why they aren't around anymore. We must stop our dependence on fossil fuels and it is a good idea to start at home. PSE clean up your act. You can provide renewable clean energy and not support fracked gas. Also storage facilities will have problems, most likely with leaking and human error is always an issue, so don't build a storage facility in Tacoma. It is going backwards, not forwards and it endangers what truly feeds us and supports us, clean air, clean water, natural balance and a healthy food chain.

FYI Out of 89 speakers, the majority spoke For the interium regulations for either 6 months or one year. Hopefully they will pause industrial uses to at least stop any applications for expanding the LNG and other applications for use from approval. Support for the tribe was strong. The council stated that they would be sitting at the table with the community members to discuss future planning. Environment vs Industry. I got there late so missed the first part.

Whether or not the Governor has permitting powers, he does have a bully pulpit that he can use to encourage the permitting agencies to behave in a

Fracking IS the MOST adulteration practice of our planet ! ALSO consider: "Beginning in 2009, the frequency of earthquakes in the U.S. State of Oklahoma rapidly increased from an average of fewer than two 3.0+ magnitude earthquakes per year since 1978[6] to hundreds per year in 2014, 2015, and 2016. Thousands of earthquakes have occurred in Oklahoma and surrounding areas in southern Kansas and North Texas since 2009.[7] Scientific studies attribute the rise in earthquakes to the disposal of wastewater produced during

oil extraction that has been injected more deeply into the ground.[8][9]" THAT's DUE TO FRACKING !!! THIS insanity MUST STOP !!!

A month or two ago, I went to the city and had a talk with the permit and inspection folks. Anyone building anything in Tacoma from a henhouse to an 8 million gallon LNG tank, is allowed to build with an incomplete inventory of all the permits they are required, provided they agree that they are building at their own risk, and will not occupy/operate the facility they're building until all their permits have been issued and approved. This is the path PSE has taken; it is legal in Tacoma, however little their facility appeals to me.

PSE must follow all legal requirements regarding this proposed project. They should not be allowed to continue work on the liquefied natural gas storage facility until all permits and legalities have been taken care of. I am strongly opposed to PSE's plan to store and use fracked liquefied natural gas to produce electricity. If PSE can't come up with a clean and green alternative to liquified natural gas, then they should work with their customers to find ways to save energy, thereby eliminating the need for another source of electricity production. Why has our government allowed PSE to start constructing a facility that has yet to be permitted? I can promise you that government would quickly stop a house that was being built without a permit. Unusual LNG Tank! usually Concrete Outer with 9%Nickel Inner.
Tanks are usually built so that the LNG will burn should there be a breach.
To store LNG there has to be a refrigeration unit to take product down to -161C & keep it there! At -161C product is 1-600th of its volume in the atmosphere!
I see no LNG plant?
Are they usually built a very long way from Residential areas?

A) Earth, with clean aquamarine water, air that you can take a deep breath and feel alive and vital, true-blue skies, luscious green forests and landscapes, flowers of every colour, all wild-life thriving and abundant. Or,
B) Earth, toxic water, toxic air that makes you choke and cough, toxic food supply. Don't be naive and think you're only poisoning the peons. Again, you live in an ecosystem, so it affects you too, whether you recognize that fact or not. Choose wisely, my friend.

It is just like the Cuyahoga River on fire all over again...Look it up....The break walls of Lake Erie with signs that say: "Help me I'm dying." this is what Trump means by Make America Great Again...He wants to take us back to what made Warren Buffet rich just like Beatrice Foods in a Civil Action... Read about it yourselves...Don't rely on what I say....They are taking us back to the days of Johns Manville and Allegheny International....Warren Buffet held the float!!! It made him rich when he drove companies into bankruptcy, then bought them for cents on the dollar...They are making America sick again, and there won't be a cure...It isn't even Super Fund...It is worse than that!!! We are talking NRC and GAO....

WATER MONITOR PLAN
HEALTHY WATER ACTION BUSINESS PLAN
What's in your water?
What's in the water you are drinking?
The "water crisis" is right here – right now.
You need to understand your water now before you are hurt by it.
What is in Flint is right here too.
WHAT DO WE NEED TO DO TO KNOW AND UNDERSTAND OUR WATER?
We need hand held monitors to test the water wherever we are. In the water tap outlet, in the glass served in a restaurant, in the "bottled" water, in the swimming pool, local streams, rivers, bays, oceans – wherever.
We need to know the difference between "healthy, natural" water and "filtered" water, "distilled" water, "desalinated" water, "clean" water, "processed" water, "treated" water "pure" water etc.. This requires education materials.
We need to know what toxins are in the water, what they can do to our health, how they got in the water and how to get them out of the water.

We need a website, which can be accessed by anyone and is operated by non-governmental private educational organizations.
This website would identify what is in the water and answer the questions in #3 above.
We need an instruction sheet on how and to whom to report toxic materials in our water. This would include government agencies, private organizations and citizen action groups in order to raise awareness and develop action plans to rectify the challenges.
We need an instruction sheet explaining how to file a lawsuit against guilty parties if and when required to initiate remediation.
ISSUES TO KEEP IN MIND THROUGHOUT ENTIRE PROCESS OF REMEDIATION.
Government agencies and businesses for profit can not be trusted to supply complete and accurate information. Always remember what is still happening in Flint. This is the same everywhere in this country at this time. Philadelphia and Chicago are the worst cities for lead in the water at this time.
People do not understand the difference between “healthy natural” water and all of the non specific words used to describe it listed in #2. Everything listed in #2 are dead and without the elements and minerals necessary for healthy human bodies. The model used by water treatment facilities is “distilled” water – this is dead and empty water with incomplete content for healthy bodies.
We need to know the chemical definition of “healthy natural” water to know and understand what nature put in the water, what is required for human health, what are the body responses for what is missing and what is really critical. To understand this and operate with reliable information, we need what could be called “HEALTHY WATER CITIZEN MONITORS” and have these available to every American, provided by government funding in order to protect our constitutional rights to healthy water as American citizens.
THIS TECHNOLOGY CAN NOW BE APPLIED TO CONSTANT MONITORING OF ANY OPEN WATERS INCLUDING THE DELAWARE ESTUARY AND BAY
Consistent with our original goals of cleaning the Delaware River estuary and bay waters, the hand held technology can go anywhere and anytime in boats, on foot, in automobiles etc. to run real time specific on site testing of open waters, discharges, stream entries or any potential sources of pollution. If found, instant reporting and call for remediation of any pollution sources can be accomplished immediately and on site.
The final step for constant monitoring of any open water will be to apply this technology to satellite transmission technology to enable constant monitoring of any open water at any time on the planet located by GPS locations. When this technology is implemented, the polluters will have no recourse than stop polluting to avoid prosecution. There will be no place or manipulation procedure to hide anymore.
THIS ACTUALLY IS ONE WAY TO KEEP AMERICA “HEALTHY AND STRONG”!
The agencies lie - that's why we need to do it ourselves.
This meter would show things that should be in the water in green - dangerous

pollutants in red - questionable chemicals in white. There would be a connection to satellite for explanations, GPS location and agency contacts to report criminal discharges and dangerous pollution. Agency reports (think Flint) do not tell the truth. This technology does not exist yet. We have to join together to make it happen, which will threaten all government agencies and public water suppliers as well as give us a tool to see the river condition any time - any place and report it real time.

Please stop the PSE LNG Fracked Fossil Fuel monstrosity being almost completed at the Port of Tacoma on Puyallup Tribal Grounds. It will kill wildlife -- we're down to 76 Orcas in the Salish Sea -- and the salmon, birds, etc., not to mention an extreme danger to residents in the area on three sides of the Port of Tacoma (our area and Seattle are the 17th worse in our country for air pollution). This is like a huge bomb being placed in an area sensitive to Tsunamis, an active Volcano (Mt. Tahoma), major earthquake fault lines, and added diesel truck pollution hauling LNG into the area threatening future generations as well. STOP THE PSE LNG PLANT. Only redeeming value: it's adds millions to deep pocket politicians and greedy lobbyists. Our own Governor Jay Inslee needs to

Regardless of the people who all their lives grew up and live in that place, respecting nature, wildlife, clean water sources.

That is what we must give to future generations who can enjoy and respect those resources for themselves and the following generations. and not allow ambition for an individual's money to satisfy the interests of large corporations detract from the right that we all have to live in clean places with clean water sources and the respect that animals and mother nature deserve.

But what can be expected from someone who has no respect for another human being as he will respect animals and the environment?

I do not know if my words are correctly expressed in English but if you can see in them my feelings for everything that surrounds us that is our planet our home.

Fracking pumps millions of gallons of secret chemical-laced water into the ground. There is no way to get it all back out. When it metriculates through the Earth's hydrological cycle and some other people want to drink it, or some other company wants to use it, someone will have to pay to try to make it clean enough for those uses. Animals and plants will have no choice. They will have to use what comes out of the ground. These companies, making a profit and leaving a mess behind, also haul millions of gallons of the polluted water away to pump into the ground at another site, again, polluting the ground water which will eventually come out somewhere where living things, including humans, need water. If you and your land make a profit fracking, the waste water is yours

and must stay on your land, until such time as it is cleaned and safe for human consumption. You can't make a profit and walk away.

We have had 42" pipelines explode and burn in Texas. Several pipelines have ruptured or split, contaminating soil and water, requiring expensive cleanup and replacement of soil and vegetation. Supertankers will be used to transport the liquified natural gas to global markets from giant plants threatening wetlands and shorelines. Meanwhile, in order to extract the wet gas or dry gas from the earth through fracking in North Dakota, Texas and other states, millions of gallons of water are being destroyed by being injected as returned waste deep into the earth never to be seen again in Nature's recycling. These high pressure injection wells are known to cause earthquakes in several areas. Toxic emissions including benzine, toluene, ethylbenzene and others escape or are vented from storage tanks, compressor stations, pipelines valves and poorly managed flares. None of this is necessary, nor can natural gas be honestly proclaimed as "clean" energy. Wind and solar natural and sustainable energy sources are expanding around the nation and the world. They are truly clean. None of the dirty and destructive production and transport of fossil fuels are needed in the great supplies of times gone by. None of the toxic effects on the

environment associated with fracking or LNG plants are necessary. Stand your ground Tacoma and Puyallup!

It will eventually be the states that determine what is going to happen on their land or coastline as far as fossil fuel mining is concerned. California banned off coast drilling for awhile until a fossil fuel friend became governor. We must control who we elect to our state governments by educating people about the dangers of climate change, water contamination and even the very air we breathe. When we get to the point where we are lowering the phytoplankton our coastal waters we will see a drop in the production of oxygen. That drop will be escalated by the destruction of the rainforests by multi-national companies which are raping the rainforests during unnecessary timber harvests, gold mining and the unsustainable attempt to establish cattle grazing on soil with limited nutrients. Indigenous people are being forced from their homes, many times being murdered when they protest or resist. We must fight corporate greed at all times by limiting what we buy and who we buy from, as well as how we personally treat our mother earth. The fight has been 45 plus years for me but I still go to rallies, join progressive political action groups and protest at capital buildings when my finances allow such. Each of us must make a sacrifice or a commitment to do without, to do it differently but most of all to do it with love and non-violence. Make sure the media is always there and always have your own cameras recording. Good luck and much love to all of you. I will keep myself apprised of your successes. And THANK YOU ALL for your commitment to save the planet.

Article on LNG mentions extraction by fracking, waiting for articles on transportation, and especially on costs associated with storge (refrigeration) and shipment.

Kurt Erlanson
Jan 5, 2018

It was once thought that natural gas could be a "bridge fuel"... that is, a fuel to bridge the transition from coal and oil to renewable forms of energy (like wind and solar). We now now that natural gas (which is now extracted by fracking) is even more polluting than oil and coal. When the gas well is "fracked" large amounts of this gas can leak out and join the other greenhouse gasses in the atmosphere. Natural gas (which is mostly methane) is forty to eighty times as potent as carbon dioxide (the one we mostly worry about) in how it leads us to global climate change.
Walk In Balance, Kurt

Jan 5, 2018

Fracking has caused earthquakes and subsidence problems in the state of Oklahoma and other states. Pollution caused by fracking operation fluids (with chemicals that are not revealed, because if revealed, then environmental agencies could do quantifying tests of the surrounding environment and receiving streams for these chemicals). Fracking has caused pollution of drinking water wells. Fracking lowers property values after the natural gas has been depleted, because the property's mineral rights become almost worthless. After the natural gas is depleted, the gas company will not pay the landowner anymore.

The pipeline/fuel transpotation industry has a deplorable record for equipment maintenance and accident readiness. There should be no expansion of delivery infrastructure until sufficient safety standards, laws, and enforcement (i.e. regulation) is implemented to ensure our lands, waterways, coastal waters, and our citizens are truly safe. The record of the industry in place currently does not satisfy these conditions.

This friggin frackin is happening in our traditional territory in northern BC and has been happening in many provinces and the USA for years and is the reason why some people have no decent water. When the companies come to us, I have said that and they keep denying the end result which includes earthquakes and contaminated water! May the Lord have his hand in this entire situation!

Leonie de Young
Jan 5, 2018
Geraldine you are right on the money with your take on the situation. We do not know enough about this "technology", but it has been proven that areas are now experiencing earthquakes where none have ever occurred previously. We need to stand up against those who are willing to sacrifice our environment, land, water & safety & welfare of its people in favor of wealthy corporations & self serving interests. Native Americans have suffered enough at the hands those who have taken their land, forced them to relocate (Trail of Tears) & often set them up for a life of poverty. Still we plot to continue to destroy their land, health & livelihood. We should respect Native Americans, they are a proud people that have respect for the land. It appears they no longer have a voice. We need to stand up for our fellow man. Prayers for the American Lobby Day and our leaders who make life changing decisions for this Nation. God bless America. Protect it from those who would seek to destroy it for financial gain.

I live in Cherokee County here in OK and these earthquakes have had everyone's nerves and finances on edge. Insurance companies are used to claims from tornadoes and floods but earthquakes are a whole new ballgame. But fracking is just one of the numerous environmental disasters in OK. In and around Ottawa County in the North, entire towns have been evacuated because of mining ruining the water supply and poisoning people and animals. In Sequoyah County in the South, the Kerr-McGhee nuclear plant disaster happened over 30 years ago and the land surrounding it won't be fit to live on for ten thousand years maybe. The people there are still suffering the effects such as cancer and autism rates being sky high. And if that wasn't enough, the coal-fired electrical plants have emitted enough poisons such as mercury in the air and water that it's not safe to eat the fish. OK is known for its lakes and

rivers as a main source of tourism dollars but if people only knew, they'd never go near the water. There's more superfund sites in OK than they are in NJ. The reason being is that OK has been a red state where the greed has always taken precedence over lives - perfect example is Scott Pruitt and the Trump Administration. Lots of Okies tied to the Trump Administration. There's 40 Tribes represented in the state of OK. Even before Trump, the Repubrussians have had no respect for minorities and the poor in our state even tho we are the majority of the population and Tribal dollars contribute more to keep the economy alive than Wal-Mart. Anyway, there's a reason they call OK Green Country. Chernobyl has nothing on us!!!

Leonie de Young
Jan 21, 2018
My heart breaks for all those who are subjected to contaminated water, air and land. The Trumpf administration is hell bent on totally devastating our oceans, land and anything else that looks like MONEY. I fear for the next generation as there will be nothing left. Something needs to be done urgently. Humans are killing the planet and they are ignoring the scientists and native people who know what needs to be done.

I hear that Oklahoma, a state where there has been substantial fracking, has been experiencing a myriad of minor earthquakes. This method of extracting oil has nothing to recommend it. Please do not permit this dangerous practice to destroy Washington's environment and harm its citizens!

Leonie de Young
Jan 21, 2018
Fracking is not understood. They are taking oil out of the ground, replacing it with water (which could be used for drinking). However, they are doing all of this without really understanding the effects it is having on the environment or the earths crust. It is about time that alternatives to oil is given serious consideration before its too late.

Do many people realize it generally CANADA to be 'paying for' shipping of FRACKED crap ACROSS AMERICA, thee USA... down to Gulf of Mexico, TX!!!?!!! Another line from Central State, generally center of Continental USA, East to PENNSYLVANIA, ABOVE land and obstruction view of vast area including Historic Oregon Trail and Mormon Trail and MANY more Historic Trails interceding, crossing, sometime while overlapping? What 'CORP', and what generally few 'Investors', talk such as Trump into 'giving' such permission to 'traffic' such DESTRUCTIVE (what left of well waters, the hell of exploding/fracking our lands, DEVASTATES, above and below [what left of natural (let alone Historic) Springs] our Nations WATERS!!!!!!!!! I agree! In 2016 Oklahoma had more earthquakes than any other state, and they were caused from fracking. Before fracking Oklahoma had hardly any earthquakes, and none of those were big enough to feel. But in 2016 there several that was felt. In fact there was two 4.3 to 4.6 within a couple minutes of

each other in the same area that caused some damage to some buildings. Fracking needs to be stopped!

Before moving to the shore of Puget Sound I lived in Connecticut on the shore of Long Island Sound. A proposal to put an LNG onto Long Island Sound was beaten off by a concerted collaboration of those on both sides of the Sound who recognized the danger the LNG would pose both to people and to the Sound itself and the natural environment on both of its sides. This meant getting agreement by the governments of Connecticut and of New York. It was a big effort to protect instead of exploit and damage an important natural resource. Lovers of birds and oysters and creatures including human beings united to reject the money-grubbing aims of the oil and gas corporations that wanted to put the LNG on the Sound. Surely the same efforts for collaboration are easier,

one would think, where there is only one state involved (Washington) instead of two (Connecticut and New York). Buckle up and get rid of the LNG!

I live in San Antonio, Texas, but have cousins in the Tacoma/Puyallup area. I have signed several general petitions opposing this LNG plant there. However, in e-mailing and/or calling Seattle Council Members, I am wondering if that will be more of a hinderance rather than a help when I do not live in Seattle. Please advise. Thank you.

If anyone knows approximately what chemicals are being used to pump into the ground for fracking to release the gas to retrieve please make that information public on a global level. I cannot find that specific chemical combination they

are using online. I have an immediate relative that has a drinking well about 500 feet deep in rock. He can no longer drink his water. I am concerned about him bathing in it. No one will test his well water for him locally because of the gas companies in the area. These gas companies have such a financial strangle hold on our government wanting their money in their jurisdictions that very few take the high road for the health and welfare of our earth that affects all living beings on it. I hope that the city council takes Kshama Sawant's lead in saying "yes" to the No LNG Resolution. Until gas companies can come up with a better chemical solution for fracking for gas, they need to be shut down indefinitely. They are poisoning the ground, the water and possibly the air we breath. Anything for a quick buck, right?

Well said! We are collectively killing ourselves by poisons, and some of these poisons will be with us forever! Radioactive poisoning alone may be enough to destroy our species as a "civilized" one. Not to mention the millions of other species which will die off as our ecosystems break down. We have got to wake up, sober up, and point our focuses to the NON-COMBUSTIBLE ENERGY SYSTEMS! Geothermal, solar-hydrogen, solar
systems, wind, tide, aquathermal- and I'm sure i'm forgetting some. We have the moneys, we have the technologies, we have the manpower, a working, if needing maintenance and upgrading sorely, grid system.
We have only to DECIDE TO DO IT! AND EVERY PETITION SIGNATURE IS A VOTE! AND WE CAN VOTE AS MUCH, AS MANY TIMES AS WE WANT TO! VOTE! VOTE! VOTE! VOTE! VOTE!

I am shocked to learn that almost 70% of natural gas comes from fracking! Thank you for the information! Urge the U.S. to look beyond their own borders at how other countries fulfill their energy needs. Also, maybe it is time for a rethinking of how much energy - be it "natural" gas or other - could be saved if we all do our part.
One example: I am still amazed by how many people let their car engines idle while waiting for the pump. In Germany, the new cars have an automatic turnoff: if the engine is idling more than, I believe, 20 seconds, it is turned off automatically. There have to be ways to conserve use of gas, too!

Its unbelievable how many people believe they "need" this to 'fuel' their lifestyle. They don't live near it. They really don't understand how there are already ways to have cars that run on water, sunlight that easily produces plenty of energy, wind rivers and a multitude of great clean inventions. That all these clean resources are bought out and hidden by big business who want profit. They only care about profit.
I wish the owner's, shareholders, and company CEO's all would have to live in the middle of the fracked area for just 1 year, forced to drink the water that runs downhill, after just a standard filter. It would take care of the problem pretty quick.

In the past 10 years they have watched land around their properties shift and sink, as well as the foundations/walls of thier homes develop major fissure cracks. Homeowners insurance will not cover repairs, due to EARTHQUAKES! This is all due to the earthquakes happening daily now from fracking! The sad part is the oil industry has had those Patents for years.
There ought to be a law to make them release to patents without asking to use them, they have already ruined to much and would only say it didn't work, but they will keep on trying and trying and trying, ect. until the whole world is fouled with crude oil.

The Pacific Ocean is full of radiation since the Japanese Fukushima Nuclear Plant blew in 2011, and leaked billions of gallons of radiation contaminated water into the Pacific since. I live off the coast of Oregon but these waters are already taking their toll on sea life here, in California and especially the Arctic. We cannot be so arrogant that to think this is not an issue of major calamity prooving man made climate change. It's destruction is with us for 1,000 years. I have 18 grandchildren and 1 great grandchild and have no intention to further this devastation by adding more oil spills to this heart wrenching mess. Write a letter, call and do something...I wouldn't eat the fish. I DON'T eat the fish. We can't allow any more devastation!

i think we're focusing on Congress too much, and need to plead Home Builders to build homes with Electric Baseboard Heating Strips and an array of Solar Panels, and plead Home Owners to buy Electric Baseboard Heating. If we are heating our homes by Natural Gas, or by Oil, and not willing to work toward converting away from those forms of heating, then we are the reason for the fracking and oil drilling. I know it's hard to admit hypocrisy, and it's easy to think, "well, one day i'll get rid of natural gas heat, but my heater's still relatively new.", but we who heat our homes with natural gas or oil are the reasons for Fracking and Oil Drilling.

No amount of economic profit is worth any more sacrifice of our waters or land. Causeing irreversible catastrophic effects that only in time WILL occur. We need to focus more on clean and other energy options. More so to curbing our dependency on fossil fuels. I hope I will still be able to visit our beautiful coast lines because if more drilling is to occur of the coast it's nothing I want to see. I including others will spend money vacationing in other beautiful countries. Effects tourism as well as the quality of life for all those living amongst these atrocities. Peter Poggi
Mar 27, 2018

There's only one reason for this project - to export our natural gas that was fracked at considerable risk to our environment.

We were told that fracked natural would lower our energy costs using the cleanest fossil fuel we have available and that justified any risk.

Well that won't be true if we export it. We need a renewable energy plan with a firm target where we reach 100% - AND we need to keep our natural gas here for our use - until we reach that target.

Energy companies want our gas turned into a bigger bottom line as fast as they can extract it - liquify it and export it. They are not interested in a renewable future, or lower energy costs for us.

STOP THIS PROJECT - STOP EXPORTING OUR ENERGY!!

I am old and disabled and can no longer travel.
So I go on the internet to see what is happening with our people,
We Aboriginal Indigenous Americans (AIA).
Since 2013 (I bought a PC) and only lately am I finding a platform where I can be heard.
So hear me now!
Tecumseh tried to bring our countries people together, but no one listened then.
Are we all still deaf, do we not have eyes.
India was subjugated for 190 years and and one peaceful man gained India its freedom from European and Euro-Indian foreign influence and thievery of natural resources.
Our native peoples subjugation started in 1492 and hasn't ended yet, 526 years.
The White Buffalo Has been born and he brought the internet with him.
[Why aren't we "petitioning" the world court for long overdue justice?]
Why don't we as a people, have an enterprise?
One that's needed by the world, one that can feed and clothe our people.
One that is safe environmentally.
Haven't we learned anything from the IRON HORSE?
They used it to break apart our peoples hold on the land.

We can use it to bring prosperity back to our people and clean transportation to the world.

We need to show the world we no longer need crude oil.

PSE has become quite the overgrown little monopoly for energy here. Most people can and should have noticed that shortly after having any "smart" meters installed by PSE, their power bill's went up unusually high - often when power is needed most during the winter months. How can you tell? well, when usage changes or little none and temps as well, and your bill jumps to double or triple in seemingly random ways that defy logic... This is what happens when a corporation becomes a virtual monopoly and no one questions it's assumption of authority over all. And now you have this... Corporations today ALWAYS have to be forced or shamed into doing the right thing... they have an innate inability to simply choose to do the right thing because Consciousness today is ruled by profits when it should be the other way around in no uncertain terms. Until this changes.. this is what we will continue to get.

Prayers for the salmon as crossed over the cedar river today. Treaties must not be up for reinterpretation whenever it becomes unprofitable for Wa. State to abide by their promises. If they can be held up for reinterpretation in modern times; then why isnt every governing document held to the same scrutiny. I'll guess why, greed. entitlement, legal action being used to further persecute and bully indiginous peoples. This review should be thrown out. I am utterly disgusted that the state of washington is even allowed to request this when it has already been found twice in court in favor of indiginous treaty rights. A promise is a promise no matter when it was made. The state of Washington has proven itself incapable of protecting native salmon, water, and anything that sustains life.. because they are too tied up in the politics/money/power game. They have a conflict of interest with life. The evidence of this is everywhere, decline of wild populations on every level.
I hope the state gets slammed down on this. They are not fit to govern living things.

Tokitae (aka Lolita), an extremely lonely & sentient being, has been driven insane by being forced to live in one of the smallest concrete prisons ever devised by an "abusement" park. The Salish Sea is sick. We do not want more petrochemical plants continuing toake it worse. I want Tokitae to have a future here. If the salmon and the Orcas can not survive, we will be next. Make it our job to protect them. Steve Storms

The arrogance of corporations like PSE to continue with such projects without proper permitting and no public commentary shows an utter disregard and contempt for our society and the rules that we all must live by to maintain it. These companies need to be put back in their place of supporting our society rather than running roughshod over it. Existing fines for ignoring regulations and proceeding with construction in the face of opposition are seen as just an additional cost of the project and will simply be passed on to consumers through higher prices. The fines need to be increased astronomically to make ignoring regulations and proper permitting too expensive. Such fines should also be structured so that companies can't simply pass the costs on to consumers through higher prices. Government of the people, by the people and for the people has been hijacked by private companies and corporations to serve their shareholders rather than all the people. That has to change if the people want to retake their government from the 1% who have bought it to serve their needs and to hell with the rest of us.

Leonie de Young

The big corporations have been given the green light to do what they want, where they want and be handed down minimum fines for doing so has been condoned by the current administration. They came and killed the beaver, the bear, elk and the buffalo.
They polluted the waters at every stream leading to the sea.
Now they want to endanger what's left inland without thought of what will happen once our inland waters become polluted as the rest.
We think it is our government doing this, but we the people are the government, perhaps it's time we got off our government asses and did what our government was founded on "WE THE PEOPLE" as a force of many becoming one voice and saying "NO MORE", WE THE PEOPLE have voted and the answer is no, you may no longer do things

behind closed doors.
You may no longer represent us and go against our wishes.

Love the last comment! I totally agree, you must take responsibility for how your actions, now, will effect future generations. Taking risks with the environment is not acceptable. I want the madness to stop. You must embrace clean green energy sources. The streams, wildlife and climate do not belong to you!

Marie-Josee Beauchamp
Jun 5, 2018

If governments and big companies think that there are no consequences for mindless destruction of natural habitats, clean water sources and people's environments..THINK AGAIN! What frightens me the most, is the lack of concern, of how urgent these issues are. They are not for future generations to worry about, because by then it will be to late, the time for actio is now. Put your big boy and big girl pants on and do the right thing now.....please.

No one in their right mind would consider fracking to be either safe or worthwhile. Only greedy corporations, or a plan to make all living things extinct due to poison. is at the bottom of fracking. It seems the entire world has gone insane with all the poisons in water, earth, air affecting everything. Please stop the madness....stop fracking. It isn't just salmon this is affecting. I love the Orcas'. They are some great gentle giants. I hate to see them starve like this, there is plenty of food in the universe to feed the animals and people but of course people as usual are doing their damage to the marine by cutting off their food supply. there is no guarantee humans will make the way for salmon to be provided back to the water for the survival of the whales. As far as some people are concerned animals can live or die for all they care. There would a lot less animal deaths if people left animals be but with all the killing for various unjustified reasons, starvation, climate change it is pushing animals to the brink.
So sorry for the whales.

All animals are synchronized with nature, moving with the natural flow of the universe, innocent in their acceptance of each moment, all contributing to the balance of the whole. All sharing in the energy of love, without impediments, without resistance... just being! And then there is the human being animal. So far the only animal that does not flow with the natural energy of the environment. Controlling the environment is a human error! We need to overcome the fear of our natural environment and start to

embrace the fact that our natural environment is a life giving miracle to all of us. We human beings need to join the flow of love and respect for all life on planet earth.

The world of people so hurt my heart very deeply on how we treat all the species of animals on Gods great Earth. If we keep going the way we are, there will be no precious animals, hardly any Earth to speak of, and we will be the endangered people. We've got to change everything we do and how we're living. It's small but significant way we can learn to help Mother Earth and all her living beings, wether plants, animals, oceans, humans or insect. Be positive and free minded to know we can make this happen and defeat all negativity against it. I want my daughter to grow up with the same forests, sunsets, places to explore that I had. Justice has been served and we have a victory today, but The GOC and Corporate Interest will not stop the fight. We as a people should not stop the fight either. Also when the Federal Elections come in 2019 we must not allow either the Conservatives or Liberals to ever be elected into power again because of their ties to Corporate Power. Just our own germs wiped out entire groups of Native Americans. We had no control of that back in the day. BUT now we do have the choice of NOT destroying the land of Native Americans. Shame on us for even thinking about fracking. It is too dangerous for all. It is too wasteful. It leaves people trying to have clean water where there is none. Don't let greed win. An earthquake, plane crash, or industrial accident can cause the hydrocarbon to leak and form a massive gas cloud. When such clouds reach an ignition source they explode with a force similar to a nuclear bomb.

Fracking is bad enough for the environment but these LNG megabombs should not be built within ten miles of residences or schools.

https://en.wikipedia.org/wiki/Flixborough_disaster
Flixborough was a lightly populated area - just a few scattered small villages. Yet 28 people were killed and 800 homes were damaged in a town three miles away.

https://en.wikipedia.org/wiki/Cleveland_East_Ohio_Gas_explosion
130 people killed and a square mile of Cleveland destroyed. One manhole cover was blown several miles to Glenville.

Explosion killed one. Rebuilt, expanded, and now doubling gas prices to local consumers.

Another example of our assault against native Americans. We have broken treaties, driven them from their lands, herded them into reservations. Now we add insult to injury when we see the opportunity for financial gain to large corporations at the expense of their lands, rivers, safety, health, & livelihood of native Americans.

Clearly PSE assumes they will get permission in the end. Hopefully, all the good people in Washington state will vote for any politician who approves breaking another treaty and destroying the land and water. November is coming! Please stand for something besides money.

Once again, as so many times in history, Native Americans get "screwed"!!

I agree. We have never kept any promises made to them. They are the original caretakers of this USA. Please respect them.

Stop killing the Orcas and salmon buy fracking and leave mother nature alone.
Mother earth was fine before fracking .
Leave the oceans and the orcas and salmon alone no fracking period.

Stop this FRACKING immediately, it is destroying the beautiful air we breathe, all for money. The downfall of the US really is the bottom line and the destruction of this beautiful world.

Whats your view on 1631. If passed do you believe that what you have been fighting for so passionately
would benefit, ie that the huge polluting project that you are trying
to stop could be delayed or postponed or ultimately transitioned into something that would benefit clean air and the environment

Ban the fracking here now. End the pollution.

Ppl who do not respect the treaty are not what I would call Canadians! What is wrong with these ppl that they would violate a bound contract between the Govt and the native Indians! We the ppl should vote these ppl out of office on both sides!

It sounds like they're violating the law. Can you not get a court order to stop? What about your governor? He's supposed to be a progressive. (Of course he's not doing squat yet for the orcas.)

Can you please message me with any information you may have about the export of fracked gas from B.C fracking wells to the proposed Tacoma LNG? I live in BC and want to stop this violence against water, climate and communities, at its source. Much solidarity, Bobby Arbess garbanzobob@yahoo.ca

We stand by the Puyallup Tribe in Tacoma as we do with First Nations in British Columbia, who are faced with the same fracking destruction. Unfortunately, our politicians are both blind and deaf in protecting our water resources. We keep electing ill-informed people.

The children are right to be concerned and take action because the older people will not be alive to reap the consequences of their greed for wealth and power.

As I've said before, the needs of Humanity are diminished by Corporate Greed and their desires to keep any profit limited to particular individuals. What these stupid, greedy people don't seem to understand is that their "profits" will suffer and is that their greedy profit demands will soon kill off the resources that give them their absurd profits at the expense of Humanity!!!

We need to stop denying the damage done by these activities. People's lives are at stake. Fund alternative non-destructive sources of power instead. I am sure there is a "write-off" to offset your expenses. Do the moral thing.....Thank you.
