

NOTICE OF PUBLIC COMMENT PERIOD
PUGET SOUND CLEAN AIR AGENCY
Proposed Order of Approval No. 11806

**Safran Cabin
12806 State Avenue
Marysville, WA 98271**

The Puget Sound Clean Air Agency (the Agency) is publishing a public notice for a proposed permit for Safran Cabin. Safran Cabin manufactures aerospace parts and currently operates three adhesive application processes, referred to as the C4-1, C4-2, and Legacy lines. These lines are used to produce honeycomb core, which is used as a structural material for aerospace parts.

The proposed Order would provide the applicant with federally enforceable emission limits formally establishing it as a minor and area source of air pollution. Safran Cabin is also proposing to modify the emission capture and control system for the Legacy line by routing currently uncontrolled emissions to an existing regenerative thermal oxidizer. This project will result in a decrease in volatile organic compound (VOC) and hazardous air pollutant (HAP) emissions from the facility. Requirements related to this emission decrease are also included in the proposed Order of Approval. There is no emission increase allowed as part of this action. This notice is published pursuant to WAC 173-400-091 and WAC 173-400-171(3)(k).

The Agency has completed a review of application No. 11806 and has made a preliminary determination that the proposal meets all the requirements of Regulations I, II and III and should be approved.
