The Puget Sound Clean Air Agency (the Agency) is publishing a public notice for a proposed permit for Crane & Crane Holdings LLC (dba TILZ). Crane & Crane Holdings LLC (dba TILZ) is proposing to construct a new commercial composting facility accepting a maximum of 14,000 tons of feedstock per year. TILZ is proposing to control VOC and odor emissions from the composting operation using an Extended Aerated Static Pile (EASP) system with positive aeration and a finished compost layer covering the compost piles. Food waste and fish waste will be limited to a maximum of 14 weight % within an individual compost pile.

This project meets the criteria for mandatory public notice under WAC 173-400-171(3)(b) for a project with an increase in emissions of any air pollutant at a rate above the emission threshold rate as defined in WAC 173-400-030. The potential emission increase of VOC is greater than the 40 ton per year emission threshold established in WAC 173-400-030.
