Re: Renewal Application for Air Operating Permit No. 10645

Dear Mr. Renninger:

Following up on your March 6, 2014 "Notice to Renew Air Operating Permit No. 10645," this letter constitutes Frederickson Power LP's (FPLP) renewal request and application for AOP No. 10645. We are providing a copy of the Air Operating Permit (AOP) with tracked changes, showing the changes to the AOP that FPLP requests for the renewed permit.

Under AOP Condition VI.A(1) and WAC 173-401-710(1), FPLP must submit a complete permit renewal application to PSCAA no later than 12 months before the permit expires. The AOP is set to expire on September 23, 2015, making the renewal application due date September 23, 2014. We are submitting this renewal application sufficiently early to allow the Agency time to review it and for us to provide any additional information the Agency may determine is required.

As discussed briefly with the Agency Compliance Manager, we did not make effective date revisions in most cases, understanding that the Agency maintains that information for use in all of its AOP renewals.

We understand that we will owe a permit renewal fee equal to 20% of our annual operating permit fee, not to exceed \$13,000. Please advise us of the exact amount we must pay for the Agency to determine our application complete.

Based on information and belief formed after reasonable inquiry, the statements and information in this AOP renewal application are true, accurate, and complete.

Sincerely,

Ric Chernesky  
Plant Manager  
Frederickson Power LP
