DETERMINATION OF NONSIGNIFICANCE

Description of Proposal

The Puget Sound Clean Air Agency is providing public notice that a General Order of Approval is proposed for temporary natural gas-fired boilers with a heat input capacity of less than 100 million British thermal units per hour (MMBtu/hr). If a final General Order is approved for use, eligible businesses may submit applications requesting coverage under the terms of the General Order of Approval. A finalized General Order of Approval would be equivalent to a Notice of Construction (NOC) Order of Approval in terms of source compliance and enforceability. This proposal is intended to provide streamlined permit processing for sources which meet the requirements to apply for coverage. If the applicability criteria for a General Order of Approval have been met, the specific approval conditions will have already been established through this process. Temporary boilers that meet the applicability criteria for coverage under this proposed General Order of Approval and comply with the specific approval conditions are not expected to produce adverse or nuisance impacts offsite.

Lead Agency

Puget Sound Clean Air Agency

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

The Agency is accepting comments on the DNS through May 25, 2023.
